ACKNOWLEDGEMENTS

I am fortunate that a research work of this kind was greatly supported by my supervisor, faculty at the University of Mysore, my friends, my organization and my friends without which I couldn't have reached this day. It gives me immense pleasure to acknowledge and to express my deep sense of gratitude to those who have helped me throughout this work.

First and foremost I thank my Research Supervisor Dr. N. S. Harinarayana, Associate Professor, Department of Library and Information Science, University of Mysore, Mysuru for his kind, timely guidance and encouragement to my research work. I still remember the initial days when we used to discuss the various topics to be considered for the research work and the kind of guidance I received. There was not a single day when I could feel am being dependent, but he made me feel that am independent to carry out my research work. I cannot forget those initial days where he set rules of Dos and Don't's. Of course, as a student, it was difficult given my situation to carry out all his instructions, but I used to discuss, and he is an open-minded person. There were instances where I committed mistakes in drawing up the data, which of course took a long time to complete this work, but he was always there to guide me the right direction. All in all, he was very much positive towards completion of this work and inspired me all along. Without his inspiring guidance, support and motivation, this task would have been incomplete.

I am greatly thankful to Professor Mallinath Kumbar, Professor Khaiser Jahan Begum, Professor M. Chandrasekhara, retired Professor V. G. Talwar, retired Professor Shalini Urs and I also thank the help extended by all the guest faculty members of the Department for their constant support, suggestions, and encouragement in the completion of this work.
