CHAPTER 1: Introduction

1.1 Coleus forskohlii (Willd.) Briq. 1-11
   1.1.1 Cultivation 1-2
   1.1.2 Ethnobotanical uses 2-3
   1.1.3 Phytochemistry 3-8
      1.1.3.1 Diterpenoids 3-4
      1.1.3.2 Essential oils 4
      1.1.3.3 Miscellaneous constituents 4-8
   1.1.4 Pharmacology 9-11
      1.1.4.1 Forskolin: A pharmacological aspect 9-10
      1.1.4.2 Pharmacological importance of some other minor diterpenoids 10-11

1.2 Cytochrome P450 11-25
   1.2.1 Classification of cytochrome P450 11-14
   1.2.2 Structure and function of cytochrome P450 15-22
      1.2.2.1 Structural characteristics of cytochrome P450 15
      1.2.2.2 Reaction catalyzed by cytochrome P450 15-16
      1.2.2.3 Plant P450: Diverse role in plants 17-22
         1.2.2.3.1 Essential pathways conserved in plant kingdom 17
         1.2.2.3.2 Core pathway conserved in all terrestrial plants 17-19
            1.2.2.3.2.1 Cinnamate Hydroxylation 18
            1.2.2.3.2.2 Fatty Acid Hydroxylation 18-19
1.2.3.3 Pathways that evolved during flowering plant evolution
1.2.3.4 Pathways unique to the plant species

1.3 Aims and Objectives of the study

CHAPTER 2: Materials and Methods

2.1 Collection of plant material
2.2 Preparation of crude extracts for forskolin quantification
   2.2.1 Instrumentation and chromatographic conditions
2.3 Extract preparation and quantification of total flavonoid content
2.4 Stress treatment for expression study of genes
2.5 Total DNA isolation from plant tissues
2.6 Polymerase chain reaction (PCR)
   2.6.1 Purification of DNA fragment from agarose gel
2.7 RNA isolation
2.8 DNase treatment
2.9 Primer designing
2.10 Cytochrome P450 library preparation
2.11 Differential display profiling of CYP gene sequences
2.12 Recombinant DNA techniques for cloning
   2.12.1 Chemicals, vectors, and strains
   2.12.2 Ligation
   2.12.3 Preparation of ultra-competent cells of E. coli (DH5α)
   2.12.4 Bacterial transformation
   2.12.5 Colony PCR
   2.12.6 Isolation and purification of plasmid DNA
   2.12.7 Sequencing of cloned fragments
   2.12.8 Rapid amplification of cDNA ends (RACE) for full length cloning of genes
      2.12.8.1 Preparation of cDNA for 5’RACE PCR reaction
   2.12.9 Glycerol stock of the recombinant clones
   2.12.10 Sequence analysis
CHAPTER 3: Isolation, identification and expression analysis of cytochrome P450 gene sequence from Coleus forskohlii

3.1 Introduction
3.2 Results
  3.2.1 Isolation of CYP genes from *C. forskohlii*
  3.2.2 Analysis of CYP sequences
  3.2.3 Spatial distribution of CYP genes and forskolin
  3.2.4 Expression profiles of CYP genes under different elicitor treatments and stresses
  3.2.5 Discussion

CHAPTER 4: Molecular cloning and characterization of three cytochrome P450 genes from Coleus forskohlii

4.1 Introduction
4.2 Results
  4.2.1 Differential display study of CYPs from *Coleus forskohlii*
  4.2.2 Cloning and sequence analysis of CYPs isolated from *Coleus forskohlii*
    4.2.2.1 CfCYP93B
    4.2.2.2 CfCYP706C
    4.2.2.3 CfCYP76
  4.2.3 Expression study
    4.2.3.1 Tissue expression study for CfCYP93B, CfCYP706C and CfCYP76
4.2.3.2 qPCR study of CfCYP93B and CfCYP706C under stress treatment 80
4.2.4 Quantification of total flavonoid content 80
4.2.5 Homology modeling and docking studies 80-93
4.2.5.1 Protein modeling and docking studies of CfCYP93B and CfCYP706C 80-92
4.2.5.2 Three dimensional structure prediction and docking studies of CfCYP76 93
4.3 Discussion 93-98

CHAPTER 5: Molecular cloning and characterization of 4 coumarate: coenzyme A ligase (4CL) and chalcone synthase from Coleus forskohlii 99-116

5.1 Introduction 99-100
5.2 Results 100-110
5.2.1 Cloning and sequence analysis of Cf4CL and CfCHS 100-105
5.2.1.1 Cloning and sequence analysis of Cf4CL 101
5.2.1.2 Cloning and sequence analysis of CfCHS 101-109
5.2.2 Expression analysis 109-110
5.2.2.1 Expression analysis of Cf4CL 109
5.2.2.2 Expression analysis of CfCHS 109-110
5.2.3 miRNA prediction 110
5.2.3.1 miRNA prediction study for Cf4CL 110
5.2.3.1 miRNA prediction study for CfCHS 110
5.3 Discussion 110-116

CHAPTER 6: Summary and future perspective 117-119
References 120-144
