ACKNOWLEDGEMENTS

The following individuals and institutions support me in this research and it is with great pleasure that I acknowledge them:

Dr. Anup Saikia, my supervisor, for his valuable guidance and consistent encouragement throughout the duration of my research work. He read and critically commented on my previous write-ups and helped me to improve my writing skills and finally completed this manuscript.

I am also thankful to Dhrubajyoti Saharia Sir and Prashanta Bhattacharya Sir for their valuable comments and suggestions in my work.

The University Grant Commission (UGC), New Delhi for awarding me a doctoral fellowship. The Forest Department of Assam for providing me important data and permission to conduct the study inside the protected areas and reserved forests. I would like to thank Mr. Ashok Das (Forest Ranger, Pobitora WLS) for his help in my research work. I also thank many colleagues and friends who helped me in my work.

My constant source of inspiration is my family specially my late mother. I am humbled by her encouragement and confidence and I offer her this completed work as a symbol of my gratitude.

Trishna Changkakati
