CHAPTER - V
RESULT, DISCUSSION AND RECOMMENDATIONS

After analysis and interpretation of data this study is incomplete without giving the results giving recommendations. The conclusions and the basis for them are included in this chapter. It is on the basis of data. The various conclusions are based. The range of the applicability of the conclusions is also indicated on the basis of limitations of sources, the sample, method, tools of collection and analysis. Conclusions are not only consisting of positive results but the negative results are also well placed in this chapter. Next are the recommendations for further studies which are included in this chapter. Research recommendations are all results that emerged during the development of research. Along with finding answers to some problems the research also uncovers some new questions which can be used to suggest interesting directions for further studies.

5.1 Main Findings and Discussion

Section 'A' : Coaching Qualities
It was concluded the overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani, It was found that the Bhiwani district is giving better coaching quality facility to the sports person in comparison to the other districts Sirsa and Hisar. It proves that a good coach makes all the differences because the Bhiwani district coaches are more dedicated than other district than other district. Bhiwani district is a sports hub. The youth of Bhiwani district like to move and choose games for their future profession because of the facilities given by Bhiwani to sports persons. Bhiwani district having so much dedicated coaches like Jagdish Singh, Raj Kumar Sangwan, Bhiwani is also relatively untouched from the development that has happened in NCR satellite town. There are many top wrestlers, boxers and other sports persons playing from Bhiwani district in National or International games. The findings of the present study were supported by Alexander et.al (1968), Ben Miller et al. (1970), Sharma (1980), Barik (1994), Singh et al. (1994) etc. and the results of these studies and the investigator's study were partially same. The results of coaching qualities related studies partially supported to the present study.
Section B : Finance Facilities
It was concluded that overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani It was found that the all districts performing equally regarding finance facilities. It concluded that Indian government funds various states or districts for games. Indian government is caring about the games and the sportspersons. So Sirsa, Hisar and Bhiwani district have fund to provide facilities to their sportsperson. The findings of the present study were supported by Yasin et. al. (1999), Satyanarayan (2002), Chapcakova (2013) etc. and the results of these studies and the investigator's study were partially same. The results of finance facilities related studies partially supported to the present study.

Section C : Health Care
It was revealed that the overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani and it was found that the Bhiwani district is giving better health care services for sports person to the sports person in comparison other districts Sirsa and Hisar. It concluded that Bhiwani comes under the tier two cities and it is merely 120 km away from national capital. Delhi is well versed with medical facilities but it is beyond the reach of common people of Bhiwani. Bhiwani is well connected to our capital city. In process to provide best health care services in tier 2nd tier three districts. They have chosen Bhiwani as the first city to convey their dream of giving affordable medical facilities to common man. So, the Bhiwani district seems to best in giving medical facilities to their sports person. Sports person of Bhiwani district got best sports supplement during the practices and completion time.

The findings of the present study were supported by Yasin et. al. (1999), Satyanarayan (2002), Chapcakova (2013) etc. and the results of these studies and the investigator's study were partially same. The results of healthcare related studies partially supported to the present study.

Section D : Food & Nutrition
It was observed that overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani and it was found that the Bhiwani district is giving better food and nutrition facility for their sports person to the sports person in comparison other districts Sirsa and Hisar. A good and healthy diet is very important part of physical activities or games. After comparison of three district, it is concluded that Bhiwani district provide better nutrition and healthy diet to their sportsperson. Mostly family in bhiwani district like to livestock breeding and farming. Therefore, the youth of Bhiwani
district get high quality veg and non veg diet from their own home and sports management took care of the food and nutrition for their sportsperson.

The findings of the present study were supported by Francies E. et. al. (2011), Brug (2007), T Mashiko et al (2004) etc. and the results of these studies and the investigator's study were partially same. The results of food and nutrition related studies partially supported to the present study.

**Section E : Infrastructure and Equipment Facilities**

It was concluded that the overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani and it was found that the Bhiwani district is giving high level infrastructure and equipment facilities to their sports person in comparison other districts Sirsa and Hisar. Bhiwani district is manufacturer of sports items and materials for different games. Applauded for providing an impart traditional touch to all the products, we have became a superior manufacturer and supplier of different games equipments. The major source of occupation of Bhiwani district is agriculture. Bhiwani also called Mini Cuba for producing top boxers, including Olympic medalist because this district provide better infrastructure and equipment facilities to their sportspersons and because of this facilities the youth of this district are more interested and dedicated in games participation than other districts.

The findings of the present study were supported by Audrey DunnGalvin et al. (2011), Gorji et al. (2011), G.B. Shan (2008), Elliott (2006), H.L. V. (2006) etc. and the results of these studies and the investigator's study were partially same. The results of infrastructure and equipment facilities related studies partially supported to the present study.

**Section F : Administrative Services**

It was concluded that the overall comparison of the three district i.e. Sirsa, Hisar and Bhiwani and it was found that the Bhiwani district is giving high level administrative services to their sports person in comparison other districts Sirsa and Hisar. Sports administration system in Bhiwani is well managed to look after the needs and security of its people. The district has 06 tehsils and around 442 villages under its control. For their control, there is a city Magistrate office that has many branches under their administration. This office is entrust with law and order, public grievances, census work, licensing, transfers, postings, and management of contingent expenses. A Deputy Commissioner is the chief administrative and revenue officer of the district and a member of the Indian Administrative Service.
Bhiwani is the strongest hub of sports activities in India. The sports which are played there like wrestling, boxing, volleyball and Running. Bhiwani has emerged as major centre of Indian boxing as all four boxers at Beijing Olympics 2008 from sports authority of India (SAI) boxing hostel at Bhiwani. Three of them Akhil Kumar, Vijender Kumar and Jitender Kumar reached the quarterfinals of their respective categories. While Akhil Kumar and Jitender Kumar lost in their respective quarterfinals but Vijender Kumar qualified to the semifinals thereby ensuring India's first ever Boxing medal (Bronze) in the 2012 Summer Olympics games. Paramjeet Samota from village Dinod, district Bhiwani who won gold medal for India in the 2010 Commonwealth Games. Sangam Soni also won a gold medal in Karate in Mumbai international level fight.

Mostly high achievers in games are belong to Bhiwani district. The adolescents and youth of the Bhiwani district like to participate in different games. Because Bhiwani district provide better coaches, finance facilities, health care services, food and nutrition, infrastructure services and administration services more than other districts. If we want to achieve a goal then we need better facilities, better infrastructure, better administration and Bhiwani fulfil all these demands of sportsperson so the players of Bhiwani district achieve more success than other districts of India.

The findings of the present study were supported by Collins et. al. (2013) and the results of this study and the investigator's study were partially same. The results of the administration services related studies partially supported to the present study.

5.2 Discussion

Games and sports may be of many kinds. Apart from school or college sports, boys and girls may take part in races, jumps, discuss throw and javelin throw and thus pass their afternoon in useful activities. They may play various games like football, cricket, hockey, volleyball, basket ball, badminton etc. Investigator investigate the variable regarding Total Quality Management of sports. The study revealed that Bhiwani district sports management gives better sports facilities than other districts. It is also conclude that Bhiwani sportsperson are better player than other districts. It management gives better sports facilities to their sports person then sports person tried their best to achieve next level. Sports person do not take interest in games due to lack of cooperation from management. Lack of facilities as compared to Hisar and Bhiwani District. Lesser participation of girls candidate. Due to lack of
awareness, parents do not encourage in sending their wards for sports. They consider it wastage of time and money. No proper sports ground facilities available sports person have to go to local parks for practice. Minimum sports activities and tournaments.

5.3 Implication of Findings

1. The findings provides the due that other researchers should investigate other games scenario too. They can explore the status of other games in different areas of different states.
2. It can help, the administrators to find out what facilities are lagging to be provided to the coaches and trainees.
3. The research will contribute to the employed districts for relevant administrative services.
4. It will help to these districts for getting better coaching qualities.
5. This will contribute to the investigating districts, better financial support.
6. Using such report nutrition and food quality will be compared in various districts of the state.
7. Researchers partner can explore that why difference occurred in the opinion of coaches and trainees opinion of administration services.
8. Further factors can be explored why financial assistance is not proper at various places of Haryana or other states.
9. This research will prompt to the other researches to find out the reason why food and Nutrition quality provided to sports persons is not appropriate and why its showing difference at some places.
10. Coaching is the base of any sports, Infrastructure and equipment are its tools. so such data will help out the administrators to provide sports person better facilities at this level.

5.4 Recommendations For Further Studies

1. A similar study can be conducted on large sample covering all the districts of Haryana.
2. A similar study can also be conducted in other States also.
3. The present study is limited to a variable i.e. quality management in sports. Further research may also be concentrated on other variables of the subjects involved.
4. The present study can also be replicated at college (general, technical and professional) and university level students.

5. It is advisable to conduct some longitudinal studies as it is likely to go a long way to evaluate the impact of the variables of the present study on students' personalities.
