I wish to thank Sri Rajiv Kumar, IFS, Secretary of Odisha Pollution Control Board and air pollution monitoring staffs for allowing me to access the air pollution data. I am thankful to all the staffs of Dr. Zakir Hussain Library and Jawaharlal Nehru University for their cooperation to easy access of study materials. I will never forget the help of the villagers of MCL area, Angul district, Odisha and especially the effort of my uncle Eng. Muralidhara Parida at the time of field survey.

I would like to thank my teachers Prof. Jagannatha Lenka, Dr. Rabi Patra, Dr. Minati Mallik, Dr. KabitaKumari, Mr. Gagarin Mohanty, Mr. Prsanta Kumar Panigrahi for their encouragement and cooperation throughout my career. I wish to thank to my well-wishers
Mr. Sangram Keshori Rout, Mr. Srimant Khuntia and Mr. Ashiskumar Behera for their cooperation and all kinds of support in my all difficulties.

I also wish to acknowledge the immense support, help and cooperation that I received from my seniors, friends and juniors like Shibananda Nayak, Jashmant Parida, Sanjay Lenka, Suvendu Barik, Kalandi Charan Pradhan, Auro Kumar Shaoo, Priyabrata Shaoo, Swatilekha Thakur and Monalisa Shaoo.

This journey would have been very tough without my intimate friend Ramakanta Tripathy. I am really indebted and thankful to him for his overwhelming support and encouragement throughout of my career life.

I am sure that nobody in this world is as happier as my mother in this achievement. Really my words fall short to express my deep love and gratitude to her, whose innumerable sacrifice and blessings has made this journey complete. Without her, this journey would have never begun. My own happiness is dejected by the absence of my father in this precious time. I can imagine how proud he would feel to see me having achieved this. I believe that his blessings will always be with me. My family members are the inspiration for me. Their love, affection and believes have always been the source of strength to complete this journey.

Tapaswini Nayak
