I take this opportunity to express my deep and sincere sense of gratitude to my teacher, Prof. K.G. Saxena for all the support and encouragement that he gave me towards the successful completion of this dissertation. His sound knowledge of methodology helped immensely in framing the structure of my study. It is indeed very difficult to express my indebtedness to the patience and understanding he has shown, always willing to listen and solve major and minor academic doubts, even when he was at his busiest. He has been and will always remain a source of inspiration for me.

The field of study was located in Garhwal Himalaya, now in the state of Uttarakhand. I am especially indebted to Dr. R.K. Maikhuri, my supervisor, who, on account of his extensive field experience could make my field work in Garhwal easy and secure. Without his help, it would not have been possible for me to complete my fieldwork in Garhwal. He always provided academic support in respect of his vast information about the field, which I hope made my study richer and more meaningful.

I sincerely thank Prof. P.S. Ramakrishnan from whose prolific knowledge on the ecological issues of the country, I have benefited greatly. He always kept an eye on the progress of my work and gave me helpful encouragement. I am thankful to Prof. V. Rajamani, Prof. J. Subba Rao, Prof. D.K. Banerjee and Prof. K. Datta, former and present Dean of School of Environmental Sciences for providing the necessary facilities and support.

I express my gratitude to Director, G.B. Pant Institute of Himalayan Environment & Development for extending his help and support. I am thankful to Prof. R.D. Gaur, Garhwal University, for helping me out with the taxonomic identification of plant species. At this juncture, I take an opportunity to express my utmost thanks and gratitude to Dr. K.S. Rao for all the support he rendered towards the completion of this work. I also record my thanks and gratitude to Mrs. Rao who gave me all the care and comfort during the course of my stay in Almora. I express my thanks to both of them.

I am extremely grateful to Dr. K.K. Sen for patiently guiding me and teaching me some of the finer aspects of lab related techniques. My special thanks are due to Drs. R.L. Semwal and Dr. Pramod Singh who have repeatedly made time for me and discussions with whom have greatly enhanced my understanding of the subject. I wish to thank Dr. Urmila Rana, Dr. Sunil Nautiyal and Dr. Shankar Tiwari for helping me during my stay in Garhwal. I deeply appreciate the affection and support extended towards me by Mr. Ram Singh Rawat and his family, particularly Usha and Chandra Mohan, who made my field stays in Pali village worth looking forward to.

I would like to thank Mr. B.D. Sharma for helping me with his expertise on lab instrumentation. Dinesh deserves a special mention for his untiring assistance during
the tedious collection of field data. I would also like to thank Puran Chand, Dayal and Vikram for their help.

I acknowledge my friends Bhaskar Sinha and Abdul Wakeel who have patiently bearad with me and whose unfailing support and encouragement has helped me through some of the difficult times. My special thanks are also due to my incredible companions Ravi, Chandreshekhar, Madan Koirala, Swarna, Charles, Jagdeesh and Bharat who have been always supportive during the last six years of, sometimes seemingly tedious, research work.

The Junior/Senior Research Fellowships granted to me by CSIR is gratefully acknowledged.

Finally, I would like to thank my mother and father for their unconditional love which has always provided me with a strong sense of security and emotional support. My brother and sister, who have been my strongest critics but also the greatest friends, have time and again given me the much required push in the right direction. My family's unfailing faith in my abilities has been the greatest source of inspiration to me.
