

Index

A

Apparent molar volume: **22, 49**

Apparent molar expansibility:
48, 49

Association constant: **30, 32,**
34, 60, 105, 122, 155

B

Binary solution: **81, 244**

Biologically active molecules:
21, 23, 81

1-butyl-4-methylpyridinium
hexafluorophosphate: **77,**
146

Bjerrum distance: **56, 60, 101**

C

Conductance: **84, 61, 66, 86,**
158

Conductivity measurement: **83**

Covalent bonding: **17, 46**

Cyclodextrin: **25-29, 113, 122**

D

Density measurement: **22, 23,**
24, 86

Dipole-dipole forces: **18, 26,**
38, 44

E

Electrolytes: **37, 38, 40, 50, 53**

Electrostatic forces: **55, 59, 64**

Electrostriction: **49**

Enthalpy: **29, 33, 34, 38, 46**

Entropy: **34, 39**

Ethanol: **66, 73, 147**

F

Formation Constant: **30, 188,**
209

FTIR measurement: **20, 31, 90,**
116, 124, 161

Fuoss Kraus method: **55, 56,**
57

G

Gibbs free energy: **33, 48, 52,**
159

Green solvents: **34**

H

H-bonding: **26, 39, 52, 212**

Hydrophilic: **28**

Hydrophobic: **28, 34**
Hydrophobic interactions: **130, 146, 202**
Hildebrand-Benesi Equation: **158, 160, 172**

I

Inclusion complexes: **33, 34, 57, 146**
Industrial applications: **27, 37**
Intermolecular forces: **42, 43**
Intermolecular interaction: **42, 43**
Intermolecular bond: **25, 38**
Ion-dipole force: **44, 48**
Ionic liquids: **26, 34, 35, 36**
Ionic mobility: **67**

J

Jones-dole equation: **111, 216, 222,**
Job's Plot: **150, 151, 213, 214**

K

Kohlrausch's equation: **62**
Kohlrausch's law: **62**

L

London dispersion interactions: **45**
Lattice energy: **48**
Lee-wheaton conductance equation: **60**
Limiting apparent molar volumes: **50**
Limiting equivalent conductance: **77**
London Force: **45**

M

Mass measurement: **83, 87, 147, 245**
Masson equation: **50**
Melting point: **34, 46**
Metallic bonding: **47**

N

Non-aqueous solvent: **35, 48, 64**
Non-covalent interactions: **114, 129**
NMR: **93, 94, 148, 145**

O

Organic solvent: **28, 64, 146**

P

Parlidoxime: **201, 209**
Partial molar volumes: **49, 52**
Pentoxifylline: **201, 203**
Pharmaceutical: **146, 176, 246**
Physicochemical properties:
27, 40, 206
Pitzer equation: **42, 50**
Protic solvent: **67**

R

Redlich-kister expression: **70, 71**
Redlich-Mayer expression: **70, 71**
Refractive index measurement:
31, 70
Repulsive interaction: **38, 55**
Room temperature ionic liquid:
35

S

Solvation: **37, 38, 39**
Stokes' law: **64, 65**
Surface Tension: **31, 33**

T

Thermodynamic properties:
42, 43

Thermostat water bath: **117, 147, 95**

Thermodynamic parameters:
39

U

UV-Visible: **30, 31, 148, 206, 209**

V

Van der waals forces: **25**
Van der waals interactions: **26, 46**
Viscosity: **31, 52, 53**
Viscous flow: **52**

W

Walden product: **64, 68**
Walden rule: **65**
Water: **26, 27, 29**

Z

Zwanzig's equations: **66, 67, 68**
