ACKNOWLEDGEMENT

This study was carried out at the Department of Oncogene Regulation, Chittaranjan National Cancer Institute (CNCI), Kolkata 700026, during the years 2011-2016 under the supervision of Dr. Chinmay Kumar Panda. This has culminated in the completion of this thesis entitled “MOLECULAR ANALYSIS OF DNA DAMAGE RESPONSE PATHWAYS IN BREAST CANCER”

First and foremost, I would like to thank all the patients who have participated in this study. I sincerely hope that their contributions will once be a reason for many more battling people like them to smile.

I express my heartfelt regards and sincerest gratitude to my supervisor, Dr. Chinmay Kumar Panda for not only his scientific outlooks, but also for his guidance in life. His able guidance, constant cooperation, valuable suggestions, logical intuitions and constructive criticisms have immensely motivated me to complete my work in a positive direction. I will always seek his blessings in every aspect of my life.

I am indebted to The Director, CNCI, Kolkata for providing me the financial support and opportunity of working in this esteemed Institute, with excellent research facilities.

I would also express my appreciation to UGC, Govt. of India for the financial support to carry out this research assignment.

I am very much grateful to Dr. Neyaz Alam, Dr. Anup Roy, Dr. Mohammad Ashrafi, Dr. Rajan Sahu and Dr. Jayesh Jha from Dept. of Surgical Oncology, CNCI for their valuable help in sample collection. I also extend my thanks to Dr. S Mondal for his co-operation in solving different statistical problems and for providing valuable patient history records. I am also thankful to all the faculty members of CNCI for all kinds of help regarding research. My sincere thanks to Dr. Sandip Majumder and Dr. Sutapa Mukherjee, Academic Coordinators, and all staff of Central Research Instrumentation Facility (CRIF): Mr. Somenath Banerjee, Mrs. Rina Das, Mr. Nitai Mondal for immense support.
I also thank Dr. Runu Chakravarty, NICED for her constructive criticism, valuable suggestions and help during this study.

I want to thank all my teachers specially Gita Miss, Sima Miss, Malebika di, Jharna di, Mahamaya di, Ranta di, Gigras Sir, Mayabi Bhattacharya Madam, Madhumita Pal Madam, Dr. G.B.N. Chainy Sir, Dr. S Das Sir for showering their blessings on me.

As every drop of water contributes to make an ocean, my lab mates’ contributed their excellence to this work. I express my gratitude to the senior lab mates Nilanjana di (Dr. Nilanjana Bhattacharya), Amlan da (Dr. Amlan Ghosh), Sraboni di (Dr. Sraboni Mitra), Dipanjana di (Dr. Dipanjana Mazumder Indra), Nupur di (Dr. Nupur Mukhejee), Debolina di (Dr. Debolina Pal) and Guru da (Dr. Guruprasad Maiti) for their guidance and friendly attitude, which made the lab environment very healthy for me. With my senior Shankha da (Dr. Sankhadeep Dutta), I have shared several light moments in cultural programs apart from the scientific curriculums. I would like to thank Rittwika di (Dr. Rittwika Bhattacharya), Santu (Dr. Santu Kumar Saha), Shreya (Dr. Shreya Sarkar), Shubhayan (Dr. Shubhayan Sur), Saimul (Md. Saimul Islam), Sudip (Mr. Sudip Samadder), Anirban (Mr. Anirban Roy Chowdhury), Atish (Mr. Atish Barua), Mukta (Ms. Mukta Basu), Pritha (Ms. Pritha Choudhury), Balarko (Mr. Balarko Chakraborty) and Debolina (Ms. Debolina Mukhopadhyay) for extending their helping hands whenever I required. I specially thank Rituparna (Mrs. Rituparna Roy) for helping me in some experiments during a terrible period of experimental failure. I wish them all a happy, healthy and successful life.

This period was not an easy path for me and several ups and downs churned my life. Some good friends supported me a lot during this phase. I specially thank Chandu (Mr. Chandraditya Chakraborty) not only for being a good colleague, but also for standing beside me in every odd hours. I wish he gets whatever he wants to achieve in life. I also thank Ruma (Ms. Ruma Sarkar) for always being a fellow-feeler. I thank Saheli (Mrs. Saheli Ghosh Talukdar), Abhijit (Mr. Abhijit Talukdar) and Abhishek (Mr. Abhishek Sil) for being such a wonderful friends for life.
I would like to solemnly acknowledge my deep and heartfelt gratitude to Swapna pishi (Ms Swapna Chakraborty), Parimal kaku (Mr. Parimal Sarkar) and Shandhya Jethima (Mrs Shandhya Mukherjee) for continuous support and well-wishing.

My words will fall short to explain the immense love and respect I have for my father Late Mr. Rajarshi Dasgupta who always stood like a roof, protecting me from every storm in my life. His dedication for the society, his ideologies, perspectives, and personality helped me to develop whatever goodness I have within me. I believe he will always inspire those people, who knew him. His memories will always be a great source of love, strength and encouragement in my life. My mother Mrs. Sarbani Dasgupta is my friend philosopher and guide. Her continuous support, love and care can be the medicine for every scratch I get from the world.

I also thank my parent-in-law Mr. Amal Kumar Roy and Mrs. Kamala Roy Choudhury for their support and encouragement for my work. I express my appreciation to my husband Sayantan whose support and love gave me strength during the difficult times and he has taken every responsibilities for my well-being.

This thesis also owes much to the love and encouragement I received from all my family members. The loving memories of Mamma (my Grand-Mother), who was the main reason behind loving the subject biology, will always remain very close to my heart. Moreover I also extend my gratitude to all those who have contributed to this thesis, if not specifically mentioned.

Hemantika Dasgupta
