I	INTRODUCTION	1-8
II	REVIEW OF LITERATURE	9-24
III	MATERIALS AND METHODS	25-36
IV	EXPERIMENTAL FINDINGS	37-74
V	DISCUSSION	85-94
VI	SUMMARY AND CONCLUSION	95-97
	BIBLIOGRAPHY	i-xiii
	APPENDIX	1-12

LIST OF TABLES

Table No.	Description	Pages
1.	Weekly meteorological data during crop season	25a
2.	Physical and chemical analysis of soil	26
3.	Effect of Cobalt, Boron and Manganese on the number of sprouts per corm.	38
3A.	Interaction among Cobalt, Boron and Manganese on the number of sprouts per corm.	39
4.	Effect of Cobalt, Boron and Manganese on the width of scape.	41
4A.	Interaction among Cobalt, Boron and Manganese on the width of scape.	42
5.	Effect of Cobalt, Boron and Manganese on the width of leaf.	44
5A.	Interaction among Cobalt, Boron and Manganese on the width of leaf.	45
6.	Effect of Cobalt, Boron and Manganese on the height of plant.	46
6A.	Interaction among Cobalt, Boron and Manganese on the height of plant.	47
7.	Effect of Cobalt, Boron and Manganese on the length of longest leaf.	49
7A.	Interaction among Cobalt, Boron and Manganese on the the length of longest leaf.	50
8.	Effect of Cobalt, Boron and Manganese on the number of leaves per plant.	51
8A.	Interaction among Cobalt, Boron and Manganese on the number of leaves per plant.	52
9.	Effect of Cobalt, Boron and Manganese on the number of days required for visibility of spike after planting of corms.	54

9A.	Interaction among Cobalt, Boron and Manganese on the number of days required for visibility of spike after planting of corms.	55
10.	Effect of Cobalt, Boron and Manganese on the number of days required for opening of the first flower on the spike after visibility of spike.	57
10A.	Interaction among Cobalt, Boron and Manganese on the number of days required for opening of the first flower on the spike after visibility of spike.	58
11.	Effect of Cobalt, Boron and Manganese on the length of spike.	59
11A.	Interaction among Cobalt, Boron and Manganese on the length of spike.	60
12.	Effect of Cobalt, Boron and Manganese on the diameter of spike.	62
12A.	Interaction among Cobalt, Boron and Manganese on the diameter of spike.	63
13.	Effect of Cobalt, Boron and Manganese, on the number of flowers per spike.	65
13A.	Interaction among Cobalt, Boron and Manganese on the number of flowers per spike.	66
14.	Effect of Cobalt, Boron and Manganese on the duration of flowering on the spike.	67
14A.	Interaction among Cobalt, Boron and Manganese on the duration of flowering on the spike.	68
15.	Effect of Cobalt, Boron and Manganese on the number of spikes produced per corm.	69
15A.	Interaction among Cobalt, Boron and Manganese on the number of spikes produced per corm.	70
16.	Effect of Cobalt, Boron and Manganese on the number of corms per hill.	72
16A.	Interaction among Cobalt, Boron and Manganese on the number of corms per hill.	73

17.	Effect of Cobalt, Boron and Manganese on the diameter of corms.	75
17A.	Interaction among Cobalt, Boron and Manganese on the diameter of corms.	76
18.	Effect of Cobalt, Boron and Manganese on the weight of corms per hill.	77
18A.	Interaction among Cobalt, Boron and Manganese on the weight of corms per hill.	78
19.	Effect of Cobalt, Boron and Manganese on the number of cormlets per hill.	80
19A.	Interaction among Cobalt, Boron and Manganese on the number of cormlets per hill.	81
20.	Effect of Cobalt, Boron and Manganese on the weight of cormlets per hill.	82
20A.	Interaction among Cobalt, Boron and Manganese on the weight of cormlets per hill.	83
