CONTENTS

SYNOPSIS

CHAPTER- I  Introduction to Antibiotic and Previous Synthetic Approaches Towards Ionomycin  1-32

  Introduction
  Previous approaches
  References

CHAPTER-II  Studies directed towards the Total Synthesis of Ionomycin  33-83

  Present work
  Experimental
  References
  Spectra

CHAPTER-III  Development Novel Methodologies  84-110

SECTION A  :  LiClO₄— catalyzed highly diastereoselective synthesis of cis-aziridinecarboxylates.

SECTION B  :  Enzymatic resolution of N-aryl azirdine carboxylates
