LIST OF FIGURES

Figure 1.1: Traditional boiling at field Nizamabad 03
Figure 1.2: Traditional method of boiling at Naigaon 03
Figure 1.3: Existing method of boiling at M.A.U. Parbhani 04
Figure 1.4: Turmeric plant with Rhizomes 07
Figure 1.5: Rhizomes after cleaning and polishing 07
Figure 1.6: Proposed mobile blancher with components 12
Figure 4.1: Load applied on the main shaft (steam receiver) 46
Figure 4.2: Stresses and internal pressure applied on a thin cylindrical vessel 49
Figure 4.3: Assembled blancher model 65
Figure 4.4: Top view, front view and side view of blancher component 66
Figure 5.1: SOLID-45, Geometry and Stress output 69
Figure 5.2: SHELL-93, Geometry 71
Figure 5.3: SHELL-93, Stress output 72
Figure 5.4: A mobile blancher with cylindrical casing 76
Figure 5.5: A mobile blancher with parts in cylindrical casing 76
Figure 5.6: A mobile blancher with hexagonal casing 77
Figure 5.7: A mobile blancher with parts in hexagonal casing 77
Figure 5.8: A mobile blancher with cylindrical housing 78
Figure 5.9: Hypermeshed model of blancher with hexagonal casing 78
Figure 5.10: Meshed model with load and boundary conditions 79
  [ Temperature 120°C in steam pipes ]
Figure 5.11: Meshed model with load and boundary conditions 79
  [ Pressure and gravity 1G ]
Figure 5.12: Meshed model with load and boundary conditions 80
  [ Mass 50 kg lumped on blancher ]
Figure 5.13: Meshed model with load and boundary conditions 80
  [ All loads: pressure, gravity 1G, temperature 120°C, load 50 kg ]
Figure 5.14: Finite element analysis results and hypermesh model of blancher with cylindrical casing

Figure 5.15: Finite element analysis results
case -1: temperature 120°C, pressure 3 bar
[assembly deflection plot]

Figure 5.16: Finite element analysis results
case -1: temperature 120°C, pressure 3 bar
[assembly/housing deflection plot]

Figure 5.17: Finite element analysis results
case -1: temperature 120°C, pressure 3 bar
[assembly/housing temperature distribution plot]

Figure 5.18: Finite element analysis results
case -1: temperature 120°C, pressure 3 bar
[housing temperature distribution plot]

Figure 5.19: Finite element analysis results
Case-1: temperature 120°C, Pressure 3 bar
[assembly stress distribution plot]

Figure 5.20: Finite element analysis results
Case-1: temperature 120°C, Pressure 3 bar
[assembly/housing stress distribution plot]

Figure 6.1: Experimental setup of fabricated blancher model

Figure 6.2: Stainless steel housing used for fabrication

Figure 6.3: Cylindrical housing with cavity

Figure 6.4: Cylindrical housing with opening for loading and unloading

Figure 6.5: Assembly of steam pipes

Figure 6.6: Installation of steam pipes in steam receiver

Figure 6.7: Blancher assembly

Figure 6.8: Baby boiler used for testing.

Figure 6.9: Finger turmeric Rhizomes

Figure 6.10: Doctor turmeric Rhizomes

Figure 6.11: Opening of blancher for loading and unloading
Figure 6.12: Boiler and blancher assembly for experimentation.

Figure 6.13: Testing of turmeric Rhizomes after boiling.

Figure 6.14: Tested turmeric Rhizome.

Figure 6.15: Unloading of boiled turmeric Rhizomes

Figure 6.16: Boiled hot Rhizomes on drying platform

Figure 7.1: An assembled blancher model with various components

Figure 7.2: Hypermesh model used for uniform heat distribution

Figure 7.3: Thermal analysis results with temperature and time limits

Figure 7.4: The Graph of thermal analysis results with temperature and time limits

Figure 7.5: Finite element analysis result

[assembly/housing temperature distribution plot]

Figure 7.6: Finite element analysis result

[housing temperature distribution plot]

Figure 7.7: Deflection plot for assembly with respect to temperature and pressure

Figure 7.8: Deflection plot for housing with respect to temperature and pressure

Figure 7.9: Stress plot for assembly with respect to temperature and pressure

Figure 7.10: Stress plot for housing with respect to temperature and pressure

Figure 7.11: A comparative graph of thermal efficiency, capacity of the plant per hour and time in minutes per batch, for various methods of turmeric processing.

Figure 7.12: A comparative graph of labour cost, fuel cost and plant cost, for various methods of turmeric processing.

Figure 8.1: The graph of break even analysis for total returns of investment
