List of Figures

1.1 Parameters of Biometrics 3
1.2 Confusion Matrix for calculating hit rate for a classification model 4
1.3 A basic ROC graph showing five discrete classifiers 5
1.4 Fingerprint Classes and Subclasses, a) Arch, b) Loop and c) Whorl 11
1.5 Block Diagram of Fingerprint Retrieval system 19
2.1 Typical Fingerprint-based Biometric System 26
2.2 Typical flow of fingerprint image pre-processing 30
3.1 Taxonomy of features used for fingerprint classification 44
3.2 Co-occurrence matrix directions for extracting texture features 49
3.3 GLCM construction based on a test image along four possible directions (0°, 45°, 90° and 135°) with distance d = 1 50
3.4 Example of LBP operator 51
3.5 Process of generating LBP features 52
3.6 Hyper-plane for classifying samples in SVM 53
3.7 Example for kNN 54
3.8 Classification flow using Fusion features with SVM / KNN 55
3.9 Sample images from the dataset used; a) NIST – 4, b) Captured 56
3.10 Confusion matrix of Testcase1 using SVM Classifier 57
3.11 Confusion matrix of Testcase2 using SVM Classifier 57
3.12 Confusion matrix of Testcase3 using SVM Classifier 58
3.13 Confusion matrix of Testcase4 using SVM Classifier 58
3.14 Confusion matrix of Testcase5 using SVM Classifier 59
3.15 Analysis of Results of various Testcases (with SVM Classifier) 59
3.16 Analysis of Results of various classes (with SVM Classifier) 60
3.17 Confusion matrix of Testcase1 using kNN Classifier 61
3.18 Confusion matrix of Testcase2 using kNN Classifier 61
3.19 Confusion matrix of Testcase3 using kNN Classifier 62
3.20 Confusion matrix of Testcase4 using kNN Classifier 62
3.21 Confusion matrix of Testcase5 using kNN Classifier 63
3.22 Analysis of Results of various Testcases (with kNN Classifier) 63
3.23 Analysis of Results of various classes (with kNN Classifier) 64
4.1 Haar wavelet for gradient calculation in (a) x-direction and (b) y-direction 67
4.2 Example for Bag of Feature Classification
4.3 Histogram representation for BoF
4.4 Classification flow using SURF features with BoF
4.5 Sample images from the dataset used; a) NIST – 4, b) Captured
4.6 Confusion matrix of Testcase1 using BoF Classifier
4.7 Confusion matrix of Testcase2 using BoF Classifier
4.8 Confusion matrix of Testcase3 using BoF Classifier
4.9 Confusion matrix of Testcase4 using BoF Classifier
4.10 Confusion matrix of Testcase5 using BoF Classifier
4.11 Analysis of Results of various Testcases (with BoF Classifier)
4.12 Analysis of Results of various classes (with BoF Classifier)
5.1 Keypoint localization at different scales
5.2 Orientation Histogram
5.3 Computation of Keypoint Descriptors
5.4 Image Retrieval Based on Bag of Words
5.5 Example for k-Means Clustering with 4 clusters
5.6 Retrieval Flow
5.7 Sample images from the dataset used; a) FVC2002, b) FVC2004 and c) Captured
