ACKNOWLEDGEMENTS

I am deeply indebted to many who have generously helped me in completing this thesis and I take this opportunity to express my sincere thanks to each and every one of them.

I wish to express my deep sense of respect and gratitude to my supervising guide, Dr. N. Balakrishna, Professor and Formerly Head, Department of Statistics, Cochin University of Science and Technology (CUSAT), who has been a constant source of inspiration during the course of my Ph.D work. He has always been patient towards my shortcomings and kept encouraging me to work in a better way. Without his help and support, perhaps, I would have not been able to write this thesis.

I am obliged to Prof. K. R. Muraleedharan Nair and Prof. V. K. Ramachandran Nair former Heads, Department of Statistics, CUSAT for their extensive support. I wish to express my sincere thanks to Prof. K. C. James, Prof. Asha Gopalakrishnan, Prof. P. G. Sankaran, Head, Department of Statistics, CUSAT and Prof. S. M. Sunoj for their wholehearted support.

My most heartfelt thanks to Dr. N. Balakrishnan, Professor, McMaster University, Canada for his valuable suggestions and guidance during my research period.

I thank Prof. C. M. Latha, Prof. Uma T. P., Prof. P. K. Venugopalan of Department of Statistics, Sree Kerala Varma College, Thrissur and Sri. Ajith Kumar Raja and Smt. Renuka Raja of Sakthan Thampuran College of Mathematics and Arts, Thrissur for their love and support throughout in my life.
I remember with deep gratefulness all my former teachers.

I take this opportunity to record my sincere respect and heartiest gratitude to all the Senior Officers and my colleagues of Department of Statistics and Information Management and Internal Debt Management Department of Reserve Bank of India, Mumbai for their support. Without their cooperation, it would have been almost impossible for me to continue research work with the job.

I convey my sincere thanks to the non-teaching staff, Department of Statistics, CUSAT for the co-operation and help they had rendered.

I also would like to thank the Department of Science and Technology for the financial support provided during the initial phase of my research at CUSAT, under a major research project on “Modelling and Analysis of Financial Time Series”.

Discussions with my friends and other research scholars of the department often helped me during the work. I express my sincere thanks to all of them for their valuable suggestions and help.

I am deeply indebted to my beloved father, mother and sister for their encouragement, prayers and blessings given to me. I am also indebted to my wife, Shiji K., for her constant help and encouragement throughout my research.

Above all, I bow before the grace of the Almighty.

RAHUL T.
