ACKNOWLEDGEMENT

The author is highly grateful to his respected Supervisor Dr.N.Natarajan, Dean, Department of Mechanical Engineering, Sri Ranganathar Institute of Engineering and Technology, Coimbatore for his enthusiastic guidance, motivation and support to get done this research work.

It is a great pleasure to express my gratitude and indebtedness to my Joint Supervisor Dr.K.Sivakumar, Professor and Head, Department of Mechanical Engineering, Bannari Amman Institute of Technology, Sathyamangalam for his guidance, encouragement, moral support and affection throughout the course of my work.

The author profoundly wishes to thank Mr.S.Sudhakar, Senior Manager (Design), BEML, Mysore, Karnataka and Prof.P.Sureshkuamr, Assistant Professor, Department of Mechanical Engineering, Bannari Amman Institute of Technology, Sathyamangalam for their continuous monitoring of the research work and aspiration during the entire course of work.

The author is grateful to the Management, Dr.A.M.Natarajan, Chief Executive and Dr.A.Shanmugam, Principal, Bannari Amman Institute of Technology, Sathyamangalam for providing necessary support and facilities to complete the work.

The author whole heartedly thanks Dr.S.Jegadheeswaran, Associate Professor, Bannari Amman Institute of Technology, Sathyamangalam for offering timely help and suggestion to carry out this research work.

This work could have been a distant dream if I did not get the moral encouragement and help from my wife, C. Kavitha. She equally shared my success and failures with me. My son V. U. Annushathithya missed me a lot and sacrificed many of his parental dreams. Finally, this thesis is the outcome of the blessings showered by Almighty Bannari Amman, the infrastructural support provided by Bannari Amman Institute of Technology and endless support rendered by my parents and my family members.
