

List of Tables		Page No.
Table 4.1	Mean values of heavy metals in paddy field soil compared with standard values	34
Table 4.2	Correlation analysis of heavy metals and physico- chemical parameters	36
Table 4.3	Mean values of heavy metals in Grains compared with standard values	40
Table 4.4	Ranges of the translocation factors of the heavy metals from soil to root, root to shoot, and shoot to grain across the sampling sites	42
Table 4.5	Health risk assessment of heavy metals via intake of rice	44
Table 5.1	Permissible limits for Indian drinking water and Tamil Nadu Pollution control Board	47
Table 5.2	Anova of spatio-temporal variation of pH in water across sampling stations	49
Table 5.3	Anova of spatio-temporal variation of conductivity in water across sampling stations	50
Table 5.4	Anova of spatio-temporal variation of TDS in water across sampling stations	51
Table 5.5	Anova of spatio-temporal variation of salinity in water across sampling stations	52
Table 5.6	Anova of spatio-temporal variation of DO in water across sampling stations	53
Table 5.7	Anova of spatio-temporal variation of BOD in water across sampling stations	55
Table 5.8	Anova of spatio-temporal variation of COD in water across sampling stations	56
Table 5.9	Anova of spatio-temporal variation of nitrate in water across sampling stations	57
Table 5.10	Anova of spatio-temporal variation of phosphate in water across sampling stations	59
Table 5.11	Anova of spatio-temporal variation of sulfate in water across sampling stations	60

Table 5.12	Anova of spatio-temporal variation of K in water across sampling stations	61
Table 5.13	Comparison of present studied heavy metals (mg l^{-1}) with various dissolved metals (g l^{-1}) in some marine and estuarine systems of Bay of Bengal of India and other parts of world	62
Table 5.14	Anova of spatio-temporal variation of Pb in water across sampling stations	64
Table 5.15	Anova of spatio-temporal variation of Cd in water across sampling stations	65
Table 5.16	Anova of spatio-temporal variation of Cr in water across sampling stations	67
Table 5.17	Anova of spatio-temporal variation of Cu in water across sampling stations	68
Table 5.18	Anova of spatio-temporal variation of Mn in water across sampling stations	69
Table 5.19	Anova of spatio-temporal variation of Zn in water across sampling stations	71
Table 5.20	Correlation matrix of physic chemical parameters and heavy metals of rivulet water	72
Table 6.1	Anova of spatio-temporal variation of pH in sediments across sampling stations	75
Table 6.2	Anova of spatio-temporal variation of conductivity in sediments across sampling stations	76
Table 6.3	Anova of spatio-temporal variation of nitrate in sediments across sampling stations	78
Table 6.4	Anova of spatio-temporal variation of phosphate in sediments across sampling stations	79
Table 6.5	Anova of spatio-temporal variation of organic carbon in sediments across sampling stations	80
Table 6.6	Comparison of metals ($\mu\text{g g}^{-1}$) in sediments of rivulet with different standard values	81
Table 6.7	Anova of spatio-temporal variation of Pb in sediments across sampling stations	82

Table 6.8	Anova of spatio-temporal variation of Cd in sediments across sampling stations	83
Table 6.9	Anova of spatio-temporal variation of Cr in sediments across sampling stations	84
Table 6.10	Anova of spatio-temporal variation of Cu in sediments across sampling stations	85
Table 6.11	Anova of spatio-temporal variation of Mn in sediments across sampling stations	85
Table 6.12	Anova of spatio-temporal variation of Zn in sediments across sampling stations	86
Table 6.13	Comparison of sediment concentrations with other rivers	89
Table 6.14	Enrichment factor of metals in the sediments	90
Table 6.15	Concentration factor (CF) of metals at various sites	90
Table 6.16	Correlation analysis of heavy metals in sediment	92
