

CONTENTS:

Chapter No.	Title	Page No.
	<i>Introduction</i>	1 – 45
1.	Thermal radiation effect on an unsteady MHD free convective viscous dissipative Couette flow between two vertical permeable plates	46 – 73
	1.1 Introduction	... 46
	1.2 Mathematical formulation	... 52
	1.3 Method of Solution	... 57
	1.4 Results and Discussions	... 60
	1.5 Conclusions	... 72
2.	Thermal radiation effect on an unsteady hydromagnetic free convective oscillatory Couette flow of a viscous fluid embedded in a porous medium	74 – 96
	2.1 Introduction	... 74
	2.2 Mathematical formulation	... 80
	2.3 Method of Solution	... 84
	2.4 Results and Discussions	... 87
	2.5 Conclusions	... 95

<i>Chapter No.</i>	<i>Title</i>	<i>Page No.</i>
3.	The effect of Hall current on an unsteady MHD free convective Couette flow between two permeable plates in presence of thermal radiation	97 – 127
3.1	Introduction	... 97
3.2	Mathematical formulation	... 106
3.3	Method of Solution	... 112
3.4	Results and Discussions	... 115
3.5	Conclusions	... 125
4.	The effect of Hall current on unsteady MHD free convective Couette flow of a Bingham fluid with thermal radiation	128 – 167
4.1	Introduction	... 128
4.2	Mathematical formulation	... 133
4.3	Method of Solution	... 140
4.4	Results and Discussions	... 144
4.5	Conclusions	... 166

Chapter No.	Title	Page No.
	5. Thermal radiation effect on an unsteady MHD natural convection Couette flow with Heat and mass transfer	168 – 199
5.1	Introduction	... 168
5.2	Mathematical formulation	... 173
5.3	Method of Solution	... 180
5.4	Results and Discussions	... 183
5.5	Conclusions	... 198
	References	200 – 234
