<u>Topic</u>	<u>Page Number</u>
A. Abstract	
B. Acknowledgement	
C. Declaration	
D. Introduction	
E. List of tables	
F. List of figures	
G. Index	
1. Chapter 1: Introduction to speaker authentication system	1-14
1.1 Introduction	
1.2 Overview of speaker authentication	
1.3 Objective of the research	
1.4 Modality of the proposed speaker authentication system	
2. Chapter 2: Literature Review of Speaker Recognition, Verification and Authentication	15-53
2.1 Speech recognition	
2.2 Model of speech recognition	
2.3 Approaches to speech recognition	
2.3.1 Acoustic Phonetic Approach	
2.3.2 Pattern Recognition Approach	
2.3.3 Artificial Intelligence Approach	
2.4 Speaker recognition	
2.5 Speaker identification and authentication	
2.6 Bodo speaker authentication system is necessary	
3. Chapter 3: Human Speech Production Mechanism	54-67
3.1 Background	
3.2 Mechanism of speech production	
3.3 Speech sound	
3.4 Challenges for speech research	
4. Chapter 4: Research Methodology	68-81

- 4.1 Introduction
- 4.2 Speech corpus development
- 4.3 Speaker selection criteria
- 4.4 Methodology used for pitch, formant frequency, mfcc, lpc, ste and zcr analysis
- 4.5 Description of Tools Used For Recording / Synthesis
- 4.6 Sample Selection
- 4.7 Noise Filtering of Speech Data
- 4.8 Words selection
- 4.9 Programming software tool-MATLAB r2009a
- 4.10 *Database creation, Recording and Organization:*
- 4.11 Annotation
- 4.12 Policy for tagging with some typical examples
- 4.13 *Prosody in Bodo Language*
- 4.14 Intonation in Bodo language
- 4.15 Database management structure
- 5. Chapter 5: Study on Bodo language 82-93
 - 5.1 Introduction to BODO Language
 - 5.2: The History of the Bodo community
 - 5.3 Linguistic Affiliation of Bodos
 - 5.4 Bodo Scripts
 - 5.5 Morphological characteristics of Bodo Language
 - 5.6 Bodoland Territory
 - 5.7 Bodo Phonology
 - 5.8 Bodo Language Tones
- 6. Chapter 6: Extraction of Features from Speech
(Getting the feature vectors from target speech for authentication) 94-177
 - 6.1 Introduction
 - 6.2 Capturing (recording) the speech signals
 - 6.3 Pre-processing
 - 6.4 Features selection
 - 6.5 Pitch estimation
 - 6.6 Formant estimation
 - 6.7 MFCC estimation

6.8	LPC estimation	
6.9	ZCR estimation	
6.10	STE estimation	
6.11	Feature Vector Compression	
6.12	Artificial Neural Network	
7.	Part A: Experiment and analysis of outcome	178-193
7.1	Pitch computation and analysis	
7.2	Formant value analysis for authentication suitability	
7.3	MFCC value analysis	
7.4	LPC feature vector analysis	
7.5	ZCR feature vector analysis	
7.6	STE analysis	
	Part B: Artificial Neural Network Design	194-244
7b.1	Introduction	
7b.2	Algorithms	
7b.3	Topology used	
7b.4	Defining multi layer perceptron	
7b.5	Training multi layer perceptrons	
7b.6	Simulating multi layer perceptron	
7b.7	Training and testing	
7b.8	Neural network data set analysis	
7b.9	Performance evaluation	
7b.10	Speech recognition/authentication	
7b.11	Speaker recognition/authentication	
7b.12:	Performance comparison of SPERIA B	
8.	Chapter 8: Limitation and future scope	245-247
9.	Publications	248
10.	References	249-269
11.	Annexure	270-272
