

## **LIST OF TABLES**

1. Table 1.1: Use of voice biometric.
2. Table 1.2: Comparison of several biometric identifiers.
3. Table 1.3: Some biometric technology classes available in the industry.
4. Table 2.1: Linguistic levels and their corresponding object of study.
5. Table 3.1: Classifications of the linguistic knowledge.
6. Table 5.1 (A): Bodo Vowels
7. Table 5.1 (B): The compound vowels of Bodo, their I.P.A representation and their use.
8. Table 5.1 (C): Occurrences of Pure Bodo Vowels.
9. Table 5.1 (D): Occurrences of Bodo vowel sounds initially, medially and finally.
10. Table 5.1 (E): Occurrences of Diphthongs in Bodo
11. Table 5.2: Bodo Consonants as per Manner, Articulatory way & example demonstration.
12. Table 5.3: Bodo Consonants as per Manner, Articulatory way & example demonstration.
13. Table 6.1: Pitch data records of six Bodo vowels for male and female speakers
14. Table 6.2: first three formants of selected Bodo vc pattern words
15. Table 6.3: Parameter list used for LPC estimation.
16. Table 6.4: Zero crossing rate feature vector table for vowels.
17. Table 6.5: Zero crossing rate feature vector table for selected Bodo consonants.
18. Table 7.1 [a]: Pitch values for six Bodo vowels for male and female informants
19. Table 7.1 [b]: Pitch values for six Bodo cv pattern words for male and female informants

20. Table 7.1 [c]: Recorded pitch values of five speakers (2 male and 3 female speakers).
21. Table 7.1 [d]: Authentication experiment results for 10 trial utterances.
22. Table 7.2: Formant frequency variation in male and female speakers for Bodo vowels.
23. Table 7.3: First three formant of selected Bodo words.
24. Table 7.4: variation of MFCC for five utterances by 5 different informants.
25. Table 7.5: Authentication experiment results for 10 trial utterances.
26. Table 7.6 [a]: ZCR of Six Bodo Vowels Uttered By Female Informants
27. Table 7.6 [b]: ZCR of Six Bodo Vowels Uttered By Male Informants
28. Table 7.6 [c]: Frame wise ZCR comparison for male and female speakers.  
Values beyond threshold are marked with Red.
29. Table 7.6 [d]: ZCR Authentication result.
30. Table 7B.1: Speaker classification for the training database.
31. Table 7B.2 [a]: Confusion matrix for the recognition of the selected Bodo word set applying 80 hidden neurons. [Speaker dependent]
32. Table 7B.2 [b]: Speaker dependent Speech recognition rate for the test database.
33. Table 7B.3 [a]: Confusion matrix for the recognition of the selected Bodo word set applying 80 hidden neurons for 50 utterances by 5 speakers (5×5=25 samples). [Speaker independent]
34. Table 7B.3 [b]: Speaker independent Speech recognition rate for the test database.
35. Table 7B.4 [a]: Classification screenshot of trained network for speech dependent speaker recognition/authentication.

36. Table 7B.4 [b]: Confusion matrix for the Speech dependent recognition of a selected speaker for Bodo word /सान/ using 80 hidden neurons for 5 utterances.
37. Table 7B.5: Text Dependent Speaker recognition rate for the test database.
38. Table 7B.6 [a]: Text Independent Speaker authentication confusion matrix.
39. Table 7B.6 [b]: Text Independent Speaker authentication rate for the test database.
