Acknowledgments

This work has been carried out at School of Pure & Applied Physics. During the course of my PhD work, a great amount of help and support has been provided by many people. I would like to acknowledge the help received.

First of all I express my gratitude to my guide Dr. C. Sudarsanakumar, Reader, School of Pure & Applied Physics, who have directed me to the field of molecular biophysics. With his guidance I was able to explore the field of molecular modeling. I also thank Prof. N.V. Unnikrishnan, my co-guide for his support during this work.

I am grateful to Prof. Chandu Venugopal, Director SPAP, for his help and support during my research work. I thank Prof. A.S. Padmanabhan, Director, M.G. University Computer Center, for providing computational time. I also thank Prof. B. Jayaram IIT Delhi, for providing computational time at Supercomputing Facility for Bioinformatics & Computational Biology. I thank Prof. David A. Case, Rutgers University, for waiving the licensing fee for AMBER suite of programs for research use. Dr. Sankararaman, Reader, Newman College, Thodupuzha had directed me to the field of research, and I would like to thank him for his continuing support. I also thank Dr. Cyriac Joseph and Dr. K. Nandakumar, faculty members, SPAP, for their friendship during my research period.

I would like to thank Renjith Thomas, St. Berchmans College Changanassery, for his help with GAUSSIAN calculation, used for the parameterization of
xDNA bases. Rajesh R. helped me with Linux during the initial stages of my work. I thank him for his great friendship and help with my work. I would like to thank Nisha Naveen, research scholar, School of Chemical Sciences, for her help at the University computer center.

I thank my group members, Bubbly S.G., Nirmala Joseph, Pragash R., Vineeshkumar T.V., Mary Varughese, Aparna P. and Jaya K.V. for the help rendered by them at various stages of my work. I also thank my fellow researchers and friends, Jeevan Job Thomas for the cover design, Shiji Krishnan for proof reading and Noble P. Abraham for his help with LATEX.

I appreciate the help of senior research scholars in SPAP Santhoshkumar A., Gopakumar P., Gijo Jose, Gin Jose, and Rajesh K.R., and my fellow researchers and friends Sreejith K. Pisharady, Arun Kumar K.V., Xavier Joseph, Amrutha K. Adiyody, Jyothy Parvathy V., and Seema Ajai for their continuing help and support. I also thank P.N. Sunilkumar, School of Bioscience, Prasanth M. and Baburaj M.S., Research scholars School of Chemical Sciences, Baiju P. Babu and Basil B. Mathew, research scholars, School of International Relations for their help and friendship.

I am grateful to my father, K.M. Varghese, who have supported me through the long years of my studies. I am also grateful to my mother Maria Varghese, brother Binu K.V., and sister Swapna Varghese for their support and understanding.

Mathew K. Varghese
