AIMS & OBJECTIVES
2.1. AIMS AND OBJECTIVES

AIM: The systematic study on biochemical indices in anemic crises with special reference to sickle cell disease in MP state.

OBJECTIVES:

1. To find out various enzymes’ activity in Sickle cell disease with reference to anemic Crises.

2. To study the various minerals in Sickle cell Disease with reference to anemic crises.

3. To study the certain biochemical indices in sickle cell disease with special reference to anemic crises.

4. To asses inflammatory parameters in sickle cell disease with special reference to anemic condition.

5. To evaluate the correlation between the various biochemical parameters in various anemic crises.

6. To assess the complication severity of different type of anemic crises in different age groups.
