Acknowledgments

At this phenomenon of academic bliss, I consider it to be my esteemed privilege to record my unending gratitude to minds and hearts, not one, but many who through their untiring and relentless efforts made the otherwise excruciating phase of getting to the terminus of a PhD research not only intellectually and professionally rewarding, but also as one which will go up as one of the most cherished moments in the annals of history of my life.

I take immense pleasure in acknowledging my sincere gratitude to my supervisor Prof. L. B. Bhuyar and co-supervisor Prof. D. G. Wakde for endowing me with the privilege of accomplishing such an application-oriented and fruitful research project. It was for their invaluable guidance, round the clock availability for suggestions and recommendations, and not to forget moral as well as technical support that the research work was completed successfully.

I have been a proud recipient of their vast experience on the subject matter as well as their professional knowledge, whenever required, which gave right directions to my efforts from time to time culminating into a gratifying completion.

The research project owes its indebtedness to several conduit hands and minds without whose selfless service it wouldn’t have occupied the form it holds presently. It was a great honor for me to be recipient of professional and moral guidance of Prof. P. D. Patil, Ex-head, Department of Mechanical
Engineering, Prof. C. G. Dethe, Prof. H. M. Zha throughout the research work.

Prof. P. M. Ardhapurkar, Prof. P. V. Bhale, department of mechanical engineering deserve thanks for their association during the progress of research work.

I would be failing in my duty if I don't make an extra special mention to the nerve centre of my experimental work Mr. G. A. Wayzode, Mr. V. H. Akhare, Mr. D. B. Wadode.

My appreciation is also due to for Prof. S. P. Trikal, Workshop superintendent, Mr. V.M. Thakre and Mr. Oimbe.

My heartiest appreciation is brought out in bold letters to the never-ending efforts of my close friends, Jaji Varghese, Saji Varghese who helped me constantly during the course of research work.

I thank AICTE, New Delhi for sponsoring the project of development of CFD center under TAPTEC, scheme that enabled me to do research on this topic.

Echoing the voice of my conscience, I always been protected and nurtured under the umbrella of blessings, moral strength, and encouragement of my mother Mrs Shashikala K. Awari and parents in law Mr. S. K. Pech, Mrs. V. S. Pech.

Not to forget, the affectionate gestures and words of inspiration of my brother Hemant Warhatkar, brother in law Jagadish Pech and Manoj Pech from time to time in moments of mental fatigue helped me sail smoothly towards the pinnacle of my technological endeavour.
My special acknowledgement goes to my wife Jaya, whose constant encouragement and assistance that helped me a lot in research work.

I would like to pay special thanks to all those who helped me directly or indirectly during the research work.

Last but the most important, I bow my head to the greatness of Almighty for making me experience one of the most technologically gratifying moments of my life.

Gajanan K. Awari
