Date

Dear Sir,

This is to introduce myself as a Ph.D. researcher doing research on the topic "Grey Literature – generation, access and dissemination, a study" at the Dept. of Library and Information Science, University of Mumbai.

Grey Literature is typically identified as non-conventional variety of literature not easily available through commercial or normal book selling channels. It is generated in all fields of knowledge but most of it remains as hidden literature. This research work is an attempt to bring into limelight this vital source of information for wider exploitation.

For the purpose of collecting more information on the topic, a simple structured questionnaire is prepared for the actual users and generators of grey literature who can respond to it and throw some light on this relatively new area of research. Your institution has been chosen as one such institution which can contribute in this field.

I shall be most thankful if you can kindly allow me to distribute few sets of questionnaire in your organisation to those users who can respond to the same. Your co-operation will be of immense value to me in understanding different shades of grey literature, hence this request.

Thanking you,

Cordially yours,

(Mrs.) P.A. Gokhale

Grey Literature: Generation, Access and Dissemination--A Study.

Questionnaire

Part 1  Basic information

1. Name (optional) ________________________________________________

2. Name and address of the organisation ____________________________
                                                                 _______
                                                                 _______
                                                                 _______

Tel. No. _______________ Fax No. ________________________________

E-Mail Address ________________________________________________

3. Type of organisation you are working in---(Please tick appropriate box,
indicating primary type as no.1. You may tick more than one, if your
organisation is interdisciplinary)

a) Academic

b) Scientific / Research

c) Industry / Business House

d) Consulting

e) Government
f) Training / Education

Part 2  Information needs / types of sources used

5) How often do you need information in the following broad subject fields? (Respond all appropriately)

<table>
<thead>
<tr>
<th>Subject field</th>
<th>Daily (4)</th>
<th>Once a week (3)</th>
<th>Sometimes (2)</th>
<th>Rarely/Not at all (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Science/Technology related, e.g. process know-how, reactions, new products, I.T.related</td>
<td></td>
<td></td>

Any other ____________________________

**Part 3. Availability of library facilities / necessary information**

8. Do you have a library in your organisation?

   Yes [ ]  No [ ]

9. If yes, do you get the necessary material / information support from your library?

   Quite satisfactorily [ ]

   Moderately satisfactorily [ ]

   Not so satisfactorily / it is still in formative stage [ ]
10. If there is no library in your organisation or it is inadequate for your requirement, how do you obtain the necessary information?

a) Visit/approach nearby libraries

b) Use your personal contacts/Informal exchange of information with colleagues

c) Directly correspond with organisations

d) Use the Internet

e) Use on line data bases on payment

f) Any other ____________________________

11. What type of information or sources of information in your opinion, is/are most difficult to obtain? ____________________________

Part 4. Generation, nature, access and dissemination (w.r.t. to GL)

12. Type or search for the information you do, or the type of work you are involved in, is considered as -----

a) Addition/contribution to existing knowledge

b) Intended to produce knowledge for practical/applied purpose

c) Experimental/developmental

d) Seeking solution to specific problem
e) Long range planning

f) Any other

13. The information generated in your organisation in the form of grey literature during the course of your work is treated as ----

Confidential ☐ Semi-confidential ☐
Open to all within the organisation ☐

14. If open and requested by other organisations, is it made available to them --

Without any restrictions ☐
With some restrictions and under some conditions ☐
Not at all ☐

15. Do you think that the desired information received from different GL sources or generated within the organisation is valid only for a limited period (in other words, either it becomes obsolete or needs to be updated continuously)

Yes ☐ No ☐

Need not be so always ☐
16. Is it temporarily useful? [ ]
   Has permanent value? [ ]

17. In your opinion, the information so generated or acquired
    in the form of grey literature, is of --
    Supplementary nature [ ]
    Contemporary nature [ ]
    Promotional value [ ]

18. Would you like to have a centralised database of all types of
    grey literature varieties (as they are not available through normal
    channels), on payment basis?
    Yes [ ] No [ ]

19. Will your organisation be willing to have an input to such a database?
    Fully [ ] Partially [ ] Can not say [ ]

20. Any other comments which you would like to add in the context
    of this questionnaire
    ___________________________________________________

Date 30 Nov. 1999

Dear ___________________

Grey Literature is a long neglected area of study in Library Science in our country, though its value is well recognised.

Mrs. P. A. Gokhale – Reader in the Department of Library and Information Science – University of Mumbai, has undertaken for her Ph.D. research, some issues relating to the generation, access & use of Grey Literature. There are some grey areas in the study too. It was thought that before arriving at a conclusion on them, it would be better to solicit views of peers who have dealt with this type of literature during their long years of practical librarianship and Information field.

I personally request you to give your views, in the form of answers to the questions – Mrs. Gokhale is sending to you.

I am sure you would like to participate in this research work.

With Regards,

Sincerely,

( Dr. ) S. R. GANPULE
APPENDIX III

Mrs. Pratibha A. Gokhale
Reader, Dept. of Library and Inf. Science,
University of Mumbai,
Kalina, Santacruz (East) Mumbai 400 098.
Tel. (022) 6528201.

Date – 5 Dec. 1999

Respected ________________

I am currently working for my Ph.D. research on the topic , "Grey Literature- generation, access and dissemination- a study", under the guidance of Dr.S.R. Ganpule. As an outcome of the research work done so far, a model for establishing an Information System for Grey Literature in India has been worked out. In this context, it is thought appropriate to seek views of the peers in the country to strengthen the research conclusions. Your rich experience in the profession would surely add value to the qualitative output of the work.

You are therefore, requested kindly to go through the attached write-up on the topic and respond to the few questions, with your remarks and suggestions. The same may please be returned to me, in the self addressed stamped envelope at your earliest but latest by December 15,1999, so as to enable me to complete my research.

Thanking you and with Best Regards,

Sincerely,

Mrs. P. A. Gokhale
APPENDIX III

Write-up

Grey literature is typically identified as semi published or non-conventional literature which remains vastly invisible and has poor bibliographic control. The increasing importance of grey literature world-wide is evident from the four biennial international conferences on grey literature held since 1995. In Europe the System for Information on Grey Literature (SIGLE) is successfully operating since 1980, having a bibliographical record of nearly 5 million documents in its database.

In India, CSIR laboratories, several research institutions, ICSSR centres, government departments, public sector undertakings, universities, non-government organisations are generating and disseminating information in the form of grey literature. However; so far there have been no systematic efforts in the country to capture and to disseminate the information available through this vital source, to wider audience.

Herewith, a model is proposed for establishing an independent Information System for Grey Literature (ISGL) in India. Given below, is the synopsis of the proposal, followed by a short questionnaire.

Information System for Grey Literature [ISGL] - Synopsis of the proposal

The Information System will consist of a national system and participating institutions. Government departments, non-government organisations, industries, public sector undertakings, universities, research institutions and all those organisations – which generate or acquire grey literature will be the participating institutions. These institutions will provide full bibliographical information about
their GL holdings (both generated and acquired), on a standard sample worksheet to the national system, (sample of worksheet enclosed) on floppies, through on-line connection or in printed form. The data received from the participating institutions will be processed, merged, stored and updated from time to time at the national system. The system will have a complete up-to-date list of participating institutions, their addresses, phone numbers, e-mail addresses with names of contact persons. The entire system will be hooked up in a networked environment. Requesting institutions can contact the apex body, from where full bibliographical information of the GL documents from the participating institutions will be made available. Once the participating institutions agree upon joining the ISGL, the responsibility of providing access/reference/document delivery (as mentioned in the worksheet) will remain with them. Eventually a home page of ISGL with suitable hyperlinks will be developed on the Internet.

**Issues to be considered while launching ISGL :**

- Constitution of ISGL
- Structure of the system
- Creation of infrastructure including manpower
- Publicity
- Funding
- Membership
- Memorandum of Understanding
- Development of suitable software and technology upgradation for query and search facilities
- Minimum hardware requirements
Questionnaire

Please respond to the following questionnaire in the context of the proposal.

1. Do you think it necessary to have an independent Information System For Grey Literature (ISGL) in India?
   - Yes [ ]
   - No [ ]

2. In your opinion, should patents and standards, any more be considered as grey literature documents – since there is reasonably good bibliographic control for them.
   - Yes [ ]
   - No [ ]

3. Should translations be considered as grey literature, as many books and periodicals are translated cover to cover?
   - Yes [ ]
   - No [ ]

4. In your opinion; which of the following models/systems for GL documents, is desirable for our country? [Please tick only one option].
   a) The present proposed decentralised model, giving bibliographical information about all types of GL documents in the country.
   - [ ]
   b) Subject based independent systems
   - [ ]

   (For example, information about all the GL documents in Economics will be available at one premier institution in the country and so also in other different institutions for other subjects).
c) Form (of the GL documents) based Information systems

(For example, information about all the theses produced in the country will be available at one apex body and likewise for research reports, seminar papers etc.)

5. Who should take the responsibility for funding and creating an infrastructure; including rights for the appointment of staff, for establishing the system?
(please tick only one option).

a) Central Government Department

b) An autonomous documentation centre supported by Central government

c) Private sector/industry/business house

d) Non-government organisation

e) One of the Universities' department

f) University Grants Commission

g) National Library Association

Any other__________________________

6. Should this be entirely a voluntary activity or governed by a legislative act passed by the central government?

_____________________________________________________________________

_____________________________________________________________________
7. There are great many varieties of GL documents and the sources from where they are available are geographically distributed far and wide. In your opinion, what should be the mechanism to identify and bring them into the proposed system?

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________

8. Should the shelf life for GL documents be specified for –

   5 years   []          10 years   []

   10-15 years   []          Permanent   []

   No need to specify   []

   Any other ________________________________

9. What should be done after the expiry of the shelf life of the GL documents?

   Dispose off   []          Convert to a microform []

   Create a CD-ROM database   []

   Any other (please specify) ________________________________

   ________________________________
10. Should there be a national level debate on the issue of having an ISGL in the country? [There was only one conference held by IASLIC in 1983 on this theme]

   Yes  [ ]  No  [ ]

11. Would you like to suggest any changes/modifications in the attached sample worksheet?

   ____________________________________________
   ____________________________________________

12. Please offer your specific comments and suggestions in the context of the questionnaire:

   ____________________________________________
