ACKNOWLEDGEMENT

I would like to acknowledge my deep sense of gratitude to my supervisor Professor J. P. Gupta & Prof A. K. Sharma for their valuable help, guidance and encouragement. They gladly accepted all the pains in going through my work again and again, and giving me opportunity to learn essential research skills. Their ability to quickly understand the depth of the problem and suggesting a clear solution has always surprised me. This thesis would not have been possible without their insightful and critical suggestions, their active participation in constructing right models and a very supportive attitude.

I would also like to thank to Dr Y. Medury, Prof S.L Maskara, Prof Sanjay Goel and Prof Bani Singh who always enlightened me by sharing their research experiences to accomplish the quality work.

I am grateful to Dr Vikas Saxena, Mr Sandeep Singh, Mr Manish Thakur, Mr Prakash Kumar, Ms Punnet Panno and faculty members of the CSE & IT department who continuously provided me suggestions for improvement. Last but not the least, I thank my parents for their blessings, wife Dr Rajni for her support and son Priyanshu for bringing cheerful moments at home.
