

ACKNOWLEDGEMENT

This thesis is being submitted in fulfillment of the primary requirement for the degree of Doctor of Philosophy in Science of the University of Calcutta.

The work leading to this dissertation has been carried out under the inspiring guidance of Prof. Manisha Pal (Supervisor), Professor, Department of Statistics, University of Calcutta. Getting an opportunity to work with Prof. Manisha Pal is indeed invaluable. I must applaud and appreciate her intellectual and potential guidance that, during my research, has benefitted me immensely. She has helped me immensely in editing the final version of this thesis. However, more than anything, I am grateful to her for the compassion with which she treated me in my difficult days. Without her selfless support it would not have been possible for me to complete this work.

The work was carried out in the Department of Statistics, University of Calcutta, Kolkata, India. I am grateful to my respected teachers of this department for enriching me with their knowledge in this subject. During my research work, I availed myself of the various facilities of the department. My friends and the scholars of the department were all very supportive and generous.

I carried out the research as a Research Fellow of CSIR-UGC with the financial support from University Grants Commission, India, under the Reference Number UGC/935/Jr. Fellow (Science) dated the 09/12/2010 and UGC/470E/Jr. Fellow (Upgradation) dated the 24/04/2013. I gratefully acknowledge it.

I confirm that no portion of this work has ever been submitted for any award or University degree of any kind.
