3.20 Graphical Representation of Logistic Regression models:
   Goodness of Fit Measure
4.1 Distribution of SHG members on the basis of type of SHPIs (Panel A) and
classification of SHGs on the basis of their affiliation to SHPIs (Panel B)
4.2 Classification of SHG members according to their (reported) Activity Status
4.3 Histogram (Panel A) and Bar plot (Panel B) showing distribution of sample
   according to Age
4.4 Bar Plot showing choice of Activity Status by the SHG members according
to their age
4.5 Bar plot (Panel A) and Box Plot (Panel B) representing sample distribution
   according to the number of family members in a household
4.6 Distribution of sample on the basis of number of children below 8 years
4.7 Bar plots showing, sample distribution according to number of old members
   (Panel A) and sample distribution according to number of dependent
   members in a family (Panel B)
4.8 Sample distribution according to the number of earning members (Panel A)
   and Activity Choice by SHG members according to number of earning
   members (Panel B)
4.9 Distribution of sample on the basis of education level (Panel A) and choice
   of activity status according to education level of SHG members (Panel B)
4.10 Monthly Income (in 1000 of Rs.) of SHG members for the sample
4.11 Sample distribution related to choice by the SHG members according to
   income of the household
4.12 Sample distribution on the basis of reported ownership of House, Land, LPG
   connection and Vehicle by the respondent
4.13 Sample distribution on the basis of reported ownership of Computer,
   Television, phone and Refrigerator by the respondent
4.14 Professional status of the partner/parents as reported by the SHG members in
   the sample
4.15 Response of the SHG members to the question related to the risk involved in
   self employment/new business activity
4.16 The response of the SHG members, to the question related to the importance of education & training; to develop sense of initiative

4.17 The response of the SHG members to the question related to the self confidence about the administrative abilities and manegerial skills to implement new business activity

4.18 Response of the SHG members to the question related to the perceived degree of difficulty of administrative procedures to start a business

4.19 Response of the SHG members to the question related to the perceived availability of financial support to start business

4.20 Response of the SHG members to a question related to the perceived difficulty in obtaining information on how to start business.

4.21 Response of the SHG members to the question related to the perceived difficulty in accessing basic infrastructural facilities

4.22 Statistically significant predictors for category “Active” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice

4.23 Statistically significant predictors for category “Failed” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice

4.24 Statistically significant predictors for category “Latent” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice

4.25 Graphical representation of multinomial logit model for category “Active with reference to category “Passive”: Goodness of Fit Measure

4.26 The process of choosing one amongst many choices related to the (Business) Activity Status

5.1 Sample distribution showing relative shares of SHG members on the basis of Activity Status Choice and Type of SHPI

5.2 Absolute numbers of respondents by type of SHPI and Activity Status choice

5.3 Distribution of sample according to occupational choice and member’s affiliation to SHPI

5.4 Distribution of absolute numbers of SHG members on the basis of their occupational choice and SHPI
5.5 Activity Status Choice by the respondents of the various SHPIs 184
5.6 Relative Shares of Activity Status categories according to SHPI 195
5.7 Age distribution of the sample according to SHPI 197
5.8 Sample distribution according to Number of Family Members and SHPI 198
5.9 Respondents reporting having relatively young children from SHPIs 199
5.10 Respondents having old members in a family from SHPIs 200
5.11 Respondents having number of dependents in a family from SHPI 201
5.12 Respondents’ distribution by number of earning members and SHPI 202
5.13 Sample distribution by income levels and SHPI 202
5.14 Sample distribution by educational level and SHPI 204
5.15 Sample distribution by profesional status of partner/parent and SHPI 205
5.16 Response of the members to the question capturing attitude to risk taking 206
5.17 Respondents’ perception about the importance of education and training in developing entrepreneurial attitude 207
5.18 Respondent’s perception about one’s own abilities and managerial skills 208
5.19 Respondents’ perception about administrative difficulties 208
5.20 Respondents’ perception about financial constraints 209
5.21 Response of the SHG/JLG members to the question related to the use of borrowed funds 210
5.22 Respondents’ response to the question related to whether they have utilise loan for productive purpose 211
5.23 shows classification of non business use of loan by the respondents 213
5.24 Respondents’ response to the question related to the perception about lack of access to information 214
5.25 Response of the members to the question related to the perceived infrastructural constraints 215
5.26 Chart showing statistically significant predictors for category “Active” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice with SHPI as one of the explanatory variable 224
5.27 Chart showing statistically significant predictors for category “Failed” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice with SHPI as one of the explanatory variable 228
5.28 Chart showing statistically significant predictors for category “Latent” with “Passive” as a reference category for Multinomial Logit Regression Model of Activity Status Choice with SHPI as one of the explanatory variable

5.29 Goodness of Fit Measure for the model
