
Acknowledgements

I would like to express my sincere gratitude to my advisor Dr. Snehasikta Swarnakar for the continuous support of my Ph.D study and related research, for her patience, motivation, and immense knowledge. Her guidance helped me in all the time of research and writing of this thesis. I would like to give thanks to Prof. Siddhartha Roy and Prof. Samit Chattopadhyay, directors of this institute, for granting me the privilege to continue my work in this esteemed institute.

I am grateful to Dr. Pramathes Dasmahapatra for the clinical collaboration and providing me with the human endometrioma samples. Thank you, Mr. Amlan K Ray for collection of all these samples for last four years. I acknowledge Dr. Rukhsana Chowdhury and Council of Scientific and Industrial Research-HUM project for the fellowship.

This thesis would not have been possible without past and present members of Dr. Swarnakar's lab. I would like to specially acknowledge Sumitda and Pradeepda for guiding me to develop the scientific interest and for showing the path to extreme dedication and hard work. I would like to thank my seniors Susridi, Shinabidi, Abhishekda, Kousikda and Niludi for their valuable advices. I would like to thank, not only colleagues but friends, Sayantan, Anirban and Deep for helping me to understand the experimental models, cell culture studies. It has been wonderful to exchange ideas and debate on scientific issues. Working was fun on those days. I thank Dharmendra, Nilanjan and Sugreev for their supports and long hours of tea breaks. It was fun to work with Sangheeta. I appreciate her sporting attitude towards science. Thanks to my juniors, Nilanjana, Anuradha, Preety and Yasmine for being there and sharing the times with me. A special thank goes to Anirbanda for his care and support. I thank all those people of IICB for graciously loaning me chemicals and help whenever needed.

Finally, I would like to thank my family.

Kasturi Chatterjee
