Chapter 1	1-24
Review of literature	
1.1. Endometriosis- a gynecological enigma	02
1.2. Epithelial to mesenchymal transition	09
1.3. Matrix metalloproteinases	12
1.4. Genetic polymorphism	21
Chapter 2	25-39
Understanding the role of matrix metalloprotease-7 in pathogenesis of human ovarian endometriosis	
2.1. Introduction	26
2.2. Objectives	27
2.3. Materials and methods	27
2.4. Results	32
2.5. Discussions	38
Chapter 3	40-74
Involvement of MMP-7 in promoting epithelial- mesenchymal transition in ovarian endometriosis	
3.1. Introduction	41
3.2. Objectives	42
3.3. Materials and methods	42
3.4. Results	48
3.5. Discussions	72
Chapter 4	75-84
Association between <i>MMP7</i> -181A>G polymorphism and risk of endometriosis	
4.1. Introduction	76
4.2. Objectives	76
4.3. Materials and methods	77
4.4. Results	79
4.5. Discussions	84
Chapter 5	85-88
Conclusion
