List of Tables

Table 1.1 Comparison between knowledge based and rule-based QA systems
Table 1.2 QA Systems implemented with Statistical models
Table 1.3 QA systems implemented with Statistical machine learning models
Table 1.4 Overview of two pattern matching techniques
Table 1.5 Overview of the three techniques on behalf of mechanism and usage.
Table 1.6 Comparative study of QA systems with respect to different question types
Table 2.1 Some QA systems during since evolution
Table 2.2 Some prominent QA systems in recent past
Table 2.3. The main features of principal state-of-the-art Question Answering systems
Table 3.1. QA corpus sub-division in classes.
Table 4.1 Question Taxonomy for Generic Classification
Table 4.2 Classification accuracy and focus word detection using Pattern matching
Table 4.3 Question classification accuracy of SVM using Incremental features
Table 4.4 Integrated Question classification approach efficiency
Table 4.5 Domain Word Type
Table 4.6 Answer class taxonomy with classification constraints
Table 4.7 Result of Answer Classification Approach
Table 5.1 Top 5 most frequent POS blocks per test sample
Table 5.2 Mean Average Precision scores of the test set of pattern matching and SQR for QA pair corpus
Table 5.3 Mean Average Precision scores of the test set of pattern matching and SQR for Search Engine
Table 5.4 MRR scores for Answer Extraction from QA corpus and Web
Table 8.1 MRR scores of Standard QA system
Table 8.2 Average rank of non-relevant concept per user
