CHAPTER-I
INTRODUCTION

1. Brief Sketch 1
2. Deformation and Displacement 3
3. Strain, Stress and Rotation 3
4. Isotropic and Aeolotropic Materials 4
5. Visco-elastic Materials 7
6. Stress-equations 8
7. Maxwell’s Equations 9
8. Thermo-elastic equations 11
9. Uses of Composite Structure 13
10. Some Important Equations 14

References 18

CHAPTER-II
ELASTIC-VIBRATIONS

PART-A
On Torsional Vibrations in a Non-Homogeneous Composite Shape Visco-Elastic Circular Cylinder

1. Introduction 31
2. Formulation of the Problem, Boundary and Continuity Conditions 32
3. General Solutions 34
4. Solution of the Problem 39
PART-B

On Radial Vibrations of a Non-Homogeneous Composite Spherical Shell

1. Introduction 43
2. Problem, Basic Equations, Boundary and Continuity Conditions 43
3. General Solutions 46
4. Solution of the Problem 48
References 53

CHAPTER –III

MAGNETO-ELASTIC VIBRATIONS

PART-A

Magnetico-Elastic Longitudinal Waves in a Triple Layered Cylindrical Shell

1. Introduction 55
2. Problem, Basic Equations, Boundary and Continuity Conditions 55
3. General Solutions 61
4. Solution of the Problem 63

PART-B

Magnetico-Elastic Radial Vibrations in a Composite Shape Non-Homogeneous Visco-Elastic Cylinder

1. Introduction 72
2. Basic Equations, Boundary and Continuity Conditions 72
3. General Solutions 77
4. Solution of the Problem 80
References 86
CHAPTER-IV
THERMO-ELASTIC VIBRATIONS
PART-A
Vibrations in a Composite Thick Plate Having Circular Cylindrical hole placed in a Temperature Field
1. Introduction 88
2. Problem, Basic Equations, Boundary and Continuity Conditions 89
3. General Solutions 91
4. Solution of the Problem 94
PART-B
Torsional Waves in a Composite Shape Non-Homogeneous Visco-Elastic Cylinder Placed in a Non-Stationery Temperature Field.
1. Introduction 97
2. Problem, Basic Equations, Boundary and Continuity Conditions 98
3. General Solutions 102
4. Particular Solution 103
References 106
CHAPTER-V
MAGNETO-THERMO-ELASTIC WAVES
Magneto-Thermo-Elastic Torsional Waves in Non-Homogeneous Composite Shape Cylinder
1. Introduction 108
2. Formulation of Problem, Boundary and Continuity Conditions 109
3. General Solutions 114
4. Particular Solution 118
References 123
APPENDIX
Bessel Equations 124
