CONTENTS

ACKNOWLEDGEMENT
PREFACE AND SUMMARY 1 – 5
CHAPTER – 1 : INTRODUCTION 1 – 6
CHAPTER – 2 : REVIEW OF LITERATURE 7 – 56

2:1. Physiology of angiosperm parasite Cuscuta reflexa Roxb. 7 – 22

2:1 – I. Seed Germination 7
2:1 – II. Seedling Growth of Dodder 10
2:1 – III. Effect of parasitic overgrowth of Dodder on the host plant 12
2:1 – IV. Metabolic studies in utotrophically grown Dodder seedlings 20

2:2. Study on weed control 22 – 31
2:2 – I. Chemical weed control and use of herbicides 22
2:2 – II. Chemical control of dodder overgrowth 24
2:2 – III. Hazards of synthetic herbicides 27
   (a)- Phytotoxic effect 27
   (b)- Residual effect 30
   (c)- Hazards to animals & human beings 31

2:3. Role of plant growth inhibitors : Role of allelochemical in weed control 32 – 49
2:4- Mode of Action of natural growth inhibitors:
   Allelo-chemical response 49 – 53
2:5- Advantage of natural products in weed control management. 54 – 56

CHAPTER – 3 : MATERIALS AND METHODS 56 – 63
3:1. Choice of test plant 56 – 57
3:2. Procurement of seed material 57
3:3. Screening of plants for germination and growth inhibitory properties against dodder (Cuscuta reflexa)
   (Bioassay Procedure) 57 – 59
3:4. Analysis of Active Plant 59 – 61
3:4 – 1. Fractional analysis and isolation of active fraction. 60
3:4 – 2. Isolation and characterization of active principle(s) 60
3:4 – 3. Determination of Minimum Inhibitory concentration 61
3:5. Mechanism of Action 61
3:6. Estimation of Total water soluble sugar 61
3:7. Estimation of total starch 61
3:8. Estimation of nitrogen and protein content 62
3:9. Assay of amylase activity 63

CHAPTER – 4 RESULTS 64 – 90
4:1. Seed germination & seedling growth bioassay
   (Screening of plant species for allelopathic effect) 64 – 72
4:2. Separation of active fraction & bioassay 72 – 76
4:3. Extraction & Isolation of Active principle 77 – 78
4:4. Characterization of Active Principle (Flavonoids) 78 – 79
4:5. Determination of minimum inhibitory sub-lethal concentration
4:6. Selective action of active principle(s)
4:7. Mechanism of action of active principle(s)
4:7 – 1. Effect of Quercetin and dihydro-quercetin on amylase enzyme activity.
4:7 – 2. Effect of active principle(s) on total soluble sugar, starch and nitrogen content in test weed seedlings

CHAPTER – 5 : DISCUSSION
CHAPTER – 6 : BIBLIOGRAPHY

Appendix : Table – 1 (Part of literature review).
