ACKNOWLEDGEMENTS

First of all I would like to give the full credit of my thesis to my parents and family. During my PhD tenure, I have been accompanied and supported by many people who have contributed not only ideas, but also criticism and suggestions which were very helpful and thought provoking. Without the support, and guidance of these people, this study would have not been completed. I feel this is the time to express my sincere gratitude to all of them.

First and foremost with a deep sense of gratitude and indebtedness, I wish to express my sincere thanks to my supervisor, Prof. W. N. Gade for his invaluable guidance, encouragement and faith in my capabilities made my journey successful. Beside research, he has taught me how to be a good and simple person. I have learnt enumerable lessons of life from him, which will lead me always in the correct path.

I would like to thank Prof. J.K. Pal, Head, Department of Biotechnology, University of Pune, for providing the facility in the Department and for giving me the opportunity to carry out research work of the thesis.

I am deeply grateful to Dr. Mahesh J. Kulkarni, Scientist, National Chemical Laboratory (NCL), Pune, Dr. Natu, Indian institute of science and (IISER), Pune for providing the facility in the Institutes for carrying out my proteomics work. I also acknowledge the help granted by Director, NRC grapes, Pune for allowing and providing the facility of sample digestion.

I am grateful to acknowledge Dr. Kapadnis for devoting his precious time in critically reading this thesis and giving his worthwhile suggestions. I am thankful to Dr. Amita Kumar, I.B.B., University of Pune, for being a source of motivation in different aspects of my research work.

My life in the lab was smooth because of my colleagues and seniors during my PhD tenure. I take this opportunity to thank Mr. Rajendra Patil, who was always there to give his helping hand and constructive suggestions have helped me. I would like to thank Dr. Suresh Kesavan for helping me in first dimension of 2D electrophoresis. I expressed my thanks to Dr. Priyanka Sharma, Dr. Sushama Mane, Dr. Sachin Bachate, Dr. Poonam Sacheti, Ms. Dipalce Thombre and Mr. Sriyaj Kamat for their kind help and good wishes. I am also thankful to Ashwan, Sneha, Manali, Sayali, Sheetal, Naina, Sarika, Priyanka, Sarita for their motivation.
Financial support from UGC by giving UGC meritorious fellowship is greatly acknowledged without which this work would not have come into existence.

I would always be indebted to my parents for being there, whenever I needed them, without being asked. To them I not only dedicate this thesis but everything I have achieved so far in life. I am lucky to have sister like Pradnya and brother like Deepak who were always there to share my little success as well as my mistakes. I thank my in laws for being the constant source of inspiration for me. Without their moral support I might not have been able to complete my venture.

A special thank goes to my daughter “Riddhi” who always cheers me up with her naughty acts and sweet talks. I love you dear. This page would not be complete without expressing a special thanks to my dearest husband Mr. Shalesh C. Darakh for his unconditional love, support and patience. I feel blessed to have him as my soul mate.
