AIM & OBJECTIVES
Chapter - 2

AIM AND OBJECTIVES

AIM

To study the morphology and morphometric parameters of the foramina of posterior cranial fossa on dry human skulls and computed tomographic scans.

OBJECTIVES

I. To observe the shape of foramen magnum
II. To measure the APD and TRD of the foramen magnum
III. To calculate the area of the foramen magnum
IV. To measure the mediolateral and transverse diameters of the right and left Jugular foramen
V. To find the presence or absence of anterior and posterior hypoglossal canals.
VI. To measure the anteroposterior and transverse diameters of anterior and posterior hypoglossal canals
VII. To compare the above data with the available literature.
