Acknowledgement

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here.

Above all, I would like to thank God, for giving me the strength and health to do this project work and success to the efforts that I have taken to complete this project.

This thesis would not have been possible without the help; support and patience of my principal supervisor. I would like to express my sincere gratitude to Dr. Cecilia for her invaluable direction and guidance during the research work and preparation of thesis. Cecilia ma'am is the person who started my association with the virus when I first worked under her supervision since May 1999 and inspired me for research. The joy and enthusiasm she has for her research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. She has taken pains to go through the thesis and she had been very kind and patient while suggesting me the outlines of this project and correcting my doubts. I am also thankful for the excellent example she has provided as a successful woman Scientist. I was privileged to experience a sustained enthusiastic and involved interest from her side. This fueled my enthusiasm even further and encouraged us to boldly step into what was a totally dark and unexplored expanse before us.

I would like to thank Dr. Sarah Cherian my co-guide, for her recommendations and suggestions to analyze my data effectively, patiently and also in the manuscript correction moreover on time despite of her busy schedules with different viruses.

I would like to thank Dr. Edward C. Holmes for helping me online with analysis of my data.

I also wish to thank Mr. Walimbe who has all taught me techniques of bioinformatics and provided me with the necessary background to be able to understand dengue virus phylogeny.

My deepest thanks to director, Dr. Mishra for his support and providing me this opportunity to complete my Ph.D. and for having permitted me to carry out this project work. I would also thank Pune University for giving me permission to do Ph. D.
We express our deepest gratitude to our SAO Mr. Laxminarayan, for his invaluable blessings and keeping me away from administration problems.

I would also like to thank my seniors Dr. Paresh Shah, Mr. Anand Singh and Mr. S.F. Naik who were ready with a positive attitude all the time, whether it was an off-hand comment to encourage us or a constructive piece of criticism.

Special thanks should be given to my colleagues Asha, Rupali, Namita, Samatha, Priya, Nidhi, Liji, Suhas, Joy, Aditya, Himanshu, Ashish for their advice and their willingness to share their bright thoughts with me, which were very fruitful for shaping up my ideas and research throughout this project. Without their moral support I wouldn’t have had the energy to fulfill my goals. Last but not least, Mahadeo, Ramya and Guru who helped me for sequencing. Thanks and appreciation to the helpful people Pradip, Supe, Pandey for their help.

I would like to thank Mr. Ranawade, Mrs. Varsha and Shamal for extending a helping hand for sequencing and Vishal from NIV library for providing me articles required for completing this thesis on time.

I would like to thank my mother in law Sarasvati Patil who took over my home responsibilities when I needed it most. I thank my husband Ajay, for his support and encouragement to complete this task so that I didn’t procrastinate in doing it.

Finally, words alone cannot express the thanks I owe to my beloved parents Ranjana and Arvind Pawar, for their blessings, encouragement and moral support love and affection. I would like to thank my brother Swapnil and sister Bhagyashri. They always have provided unwavering love and encouragement.

I would like to thank my beloved son Nilay who forms the backbone and origin of my happiness. He was the spark that rekindled my dream and led me to complete my Ph. D. I hope he will always know how grateful I am to him, and how much I love him. To him and my father I dedicate this thesis.
