# CONTENTS

**Acknowledgements** i  
**List of Figures** ii  
**List of Tables** vi  
**List of Appendices** ix  
**Plates** x  
**INTRODUCTION** 1-7  
I. Statement of the Problem  
II. Aims and Objectives  
III. Research Hypotheses  
IV. Data Base  
V. Research Methodology  
VI. Organisation of the work  

**CHAPTER -1** 8-27  
**CONCEPTUAL FRAMEWORK**  
1.1 Basic Concept of Solid Waste Management  
1.2 Meaning and Definition of Solid Waste Management  
1.3 Basic Issues of Solid Waste Management  
1.3.1- Solid Waste Characteristics  
1.3.2- Generation Aspects of Solid Waste  
1.3.3- Sources and Types of Solid Waste  
1.3.4- Nature and Composition of Solid Wastes  
1.3.5- Problem of Solid Waste Storage and Collection  
1.3.6- Methods of Solid Waste Disposal  
1.3.7- Solid Waste Characterization  
1.4 Management Practices of Solid Waste  
1.5 Management Policies of Solid Waste  

**CHAPTER -2** 28-44  
**REVIEW OF THE WORK DONE ON**  
2.1- Literature Review on Nature and Characteristics of Solid Waste
CHAPTER-3  
GEOGRAPHICAL SETTING OF THE STUDY AREA

Physical Aspects

3.1- Location and Extent of the Study Area
3.2- Relative Relief
3.3- Drainage Pattern
   3.3.1- Natural Drainage- Main Rivers
   3.3.2- Open Drains (Nalas)
3.4- Climatic Characteristics

Human Aspect

3.5- Demographic Profile
   3.5.1- Distribution of Population
   3.5.2- Population Density
   3.5.3- Population Growth
   3.5.4- Literacy Pattern
   3.5.5- Land Use Pattern
   3.5.6- Transport Network

CHAPTER-4  
ASSESSMENT OF SOLID WASTE GENERATION PROBLEMS

4.1- Identification and Characterization of Solid Waste Generation
4.2- Analysis of Zone wise Percent Distribution of Non-biodegradable Waste and Moisture content
   4.2.1- Percent Distribution of Non biodegradable Waste in Zone-1
   4.2.2- Percent Distribution of Non-biodegradable Waste in Zone-2
   4.2.3-Percent Distribution of Non-biodegradable Waste in Zone-3
   4.2.4-Percent Distribution of Non-biodegradable Waste in Zone-4
4.2.5-Percent Distribution of Non biodegradable Waste in Zone-5
4.2.6-Percent Distribution of Non biodegradable Waste in Zone-6

4.3- Analysis of Zone wise Percent Distribution of Biodegradable Waste and Moisture content
   4.3.1- Percent Distribution of Biodegradable Waste in Zone-1
   4.3.2- Percent Distribution of Biodegradable Waste in Zone-2
   4.3.3- Percent Distribution of Biodegradable Waste in Zone-3
   4.3.4- Percent Distribution of Biodegradable Waste in Zone-4
   4.3.5- Percent Distribution of Biodegradable Waste in Zone-5
   4.3.6- Percent Distribution of Biodegradable Waste in Zone-6

4.4 Estimation of total Waste Generation in Kanpur City
4.5 Spatial Pattern of Waste Generation in Kanpur City
4.6 Zone wise Estimation of Polythene Waste Generation

CHAPTER-5
99-115
ASSESSMENT OF SOLID WASTE COLLECTION AND DISPOSAL SYSTEM
5.1- Existing Method of Collection System in Kanpur city
   5.1.1- Primary Waste Collection System
   5.1.2- Secondary Waste Collection System
5.2- Problems of Handling/ Managing of Solid Waste.
   5.2.1- Problem of Existing Transport System
      5.2.1.1 Inefficient and Unscientific Manual Loading of Waste
      5.2.1.2 Irregular Transportation
      5.2.1.3. Work Shop
      5.2.1.4 Open Trucks Cause Nuisance
      5.2.1.5. Selection and routing of Vehicle
      5.2.1.6 Type of Vehicles to be used in the Study Area
   5.2.2- Status of Waste Storage Facilities
   5.2.3- Lack of Dumping Sites
5.2.4- Lack of Equipment and Modern Technologies
5.2.5- Poor Management and Governance
5.2.6- Political Problems
5.3- Waste Processing and Disposal Mechanism
   5.3.1- Recyclable Wastes and Rag pickers
   5.3.2- Bio-degradable Wastes
   5.3.3- Non-biodegradable Wastes
   5.3.4- Status of present and proposed landfill sites

CHAPTER- 6

VULNERABILITY ASSESSMENT OF URBAN ENVIRONMENT

6.1- Zone wise Vulnerability Assessment through Relative Relief
6.2- Zone wise Vulnerability Assessment through Density of Population
6.3- Zone wise Vulnerability Assessment through Quantity of Waste Generation
6.4- Zone wise Vulnerability Assessment through Quantity of Polythene Generation
6.5- Zone wise Vulnerability Assessment through Pattern of Literacy
6.6- Zone wise Vulnerability Assessment through Income group
6.7- Zone wise Vulnerability Assessment through Sweeper-Population Ratio
6.8- Zone wise Vulnerability Assessment through Sweeper-Road Length Ratio
6.9- Zone wise Vulnerability Assessment through population-Bin Ratio
6.10- Zone wise Vulnerability Assessment through length of Open Drain (Nala’s)
6.11- Cumulative View of Vulnerability Assessment Criteria of Solid Waste Problem
6.12- Comparative Analysis of Findings

CHAPTER-7

WASTE MANAGEMENT STRATEGIES AND COMBAT PLAN

7.1- Identification of Vulnerable Areas for the purpose of Planning
7.2- Proposed Strategy for Spatial Planning and Management of Solid Waste Problem in Kanpur City.
   7.2.1- Primary Waste Collection System
   7.2.2- Secondary Waste Collection System
