Figure- 20: Vapour pressure in Durg district, during the year 2012-15

Figure- 21: Vapour Pressure in Raipur district, during the year 2012 – 2015.

Figure- 22: Wind velocity in Durg district, during the year 2012 – 2015.

Figure- 23: Wind velocity in Raipur district, during the year 2012 – 2015.

Figure- 24: Evaporation in Durg district, during the year 2012 – 2015

Figure- 25: Evaporation in Raipur district, during the year 2012 – 2015.

Figure- 26: Sun Shine in Durg district, during the year 2012 – 2015

Figure- 27: Sun Shine in Raipur district, during the year 2012 – 2015.

Figure- 28: soil analysis - coarse texture in 4 zones and 10 sites of Durg and Raipur district, during the year 2012-15

Figure- 29: soil analysis - water holding capacity in four zones and 10 study sites of Durg and Raipur district, during the year 2012-15

Figure- 30: Soil Analysis - organic matter CaCO$_3$ (kg/ha) in four zones and 10 study sites of Durg and Raipur district, during the year 2012-15
Figure- 31: Soil Analysis - soluble salt (EC) (dS/m) in four zones and 10 study sites of Durg and Raipur district, during the year 2012-15

Figure- 32: Soil Analysis - pH (1:5 ratios) in four zones and 10 study sites of Durg and Raipur district, during the year 2012-15

Figure- 33: Total no of plants Studied in four zones and 10 study sites of Durg and Raipur district, during the year 2012-15

Figure- 34: Graph showing the percentage frequency of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 35: Graph showing the density of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 36: Graph showing the abundance of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 37: Graph showing the relative frequency of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 38: Graph showing the relative density of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 39: Graph showing the basal area of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 40: Graph showing the relative dominance of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 41: Graph showing the Important value index of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15
Figure- 42: Graph showing the total no. of plants in Zone I. Bhilai Industrial Area of Durg district, during the year 2012-15

Figure- 43: Graph showing the percentage frequency of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 44: Graph showing the density of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 45: Graph showing the abundance of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 46: Graph showing the relative frequency of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15.

Figure-47: Graph showing the relative density of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 48: Graph showing the relative dominance of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 49: Graph showing the basal area of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 50: Graph showing the important value index of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 51: Graph showing the total no. of plants in Zone II. Bhilai Steel Plant area of Durg district, during the year 2012-15

Figure- 52: Graph showing the percentage frequency of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15
Figure- 53: Graph showing the density of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15

Figure- 54: Graph showing the abundance of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 55: Graph showing the relative frequency of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 56: Graph showing the relative density of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 57: Graph showing the basal area of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 58: Graph showing the relative dominance of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 59: Graph showing the important value index of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 60: Graph showing the total no. of plants in Zone III. Chunkatta Bhilai Area of Durg district, during the year 2012-15.

Figure- 61: Graph showing the percentage frequency of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15.

Figure- 62: Graph showing the density of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15.
Figure- 63: Graph showing the abundance of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 64: Graph showing the relative frequency of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 65: Graph showing the relative density of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 66: Graph showing the basal area of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 67: Graph showing the relative dominance of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 68: Graph showing the important value index of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 69: Graph showing the total no. of plants in Zone IV. Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15

Figure- 70: Graph showing the total Genus and Species from 29 families of plants in 4 studied Zone I Bhilai Industrial Area, Zone II Bhilai Steel Plant Area, Zone III Chunkatta Bhilai Area of district Durg and Zone IV Botanical garden for control, Govt. NPG College of science, Raipur, district Raipur, during the year 2012-15
Figure- 71: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Cassia tora* L.

Figure-72: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Cassia tora* L.

Figure- 73: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Cassia tora* L.

Figure- 74: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Cassia tora* L.

Figure- 75: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 76: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 77: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bhilai Industrial Area, r/p ratio of plant – *Laucaena leucocephala* L.
Figure- 78: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of first zone Bilai
Industrial Area, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 79: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant – *Cassia tora* L.

Figure- 80: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant – *Cassia tora* L.

Figure- 81: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant – *Cassia tora* L.

Figure- 82: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant – *Cassia tora* L.

Figure- 83: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure- 84: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone
Bhilai Steel Plant Area, r/p ratio of plant - *Laucaena leucocephala* L.
Figure- 85: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone Bhilai Steel Plant Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure- 86: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of second zone Bhilai Steel Plant Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure- 87: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant – *Cassia tora* L.

Figure- 88: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant – *Cassia tora* L.

Figure- 89: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant – *Cassia tora* L.

Figure- 90: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant – *Cassia tora* L.

Figure-91: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant - *Laucaena leucocephala* L.
Figure-92: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure-93: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure-94: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of third zone Chunkatta Bhilai Area, r/p ratio of plant - *Laucaena leucocephala* L.

Figure-95: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Cassia tora* L.

Figure-96: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Cassia tora* L.

Figure-97: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Cassia tora* L.

Figure-98: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone
Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Cassia tora* L.

Figure- 99: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 100: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 101: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 102: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, soil of fourth zone Botanical garden for control, Govt. NPG college of science, Raipur. r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 103: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6 hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study zones , r/p ratio of plant – *Cassia tora* L.
Figure- 104: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Cassia tora* L.

Figure- 105: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Cassia tora* L.

Figure- 106: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Cassia tora* L.

Figure- 107: Growth of radical (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 108: Growth of plumule (cm) in 2 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 109: Growth of radical (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Laucaena leucocephala* L.

Figure- 110: Growth of plumule (cm) in 20 gm soil and 100 ml distilled water solution with 6
hours, 12 hours, 18 hours and 24 hours seed soaking time, mixed soil of 4 study
zones, r/p ratio of plant – *Laucaena leucocephala* L.
