ACKNOWLEDGEMENTS

First of all, I would like to gratefully acknowledge and express my sincere gratitude to my supervisor Dr. H.N Sarma, Associate professor and Dean, Faculty of Life science, Rajiv Gandhi University, for his consistent guidance, encouragement and constructive suggestions throughout the progress of my Ph.D and preparation of the theses. He was always there to meet and listening my problems and to give right advice. He showed me the different ways to approach a research problem and his ideas are going to influence in both my personal and professional life. I would like to express my deep sense of gratitude to Dr. J Chakraborty, Head of Department of Zoology for providing necessary permission and laboratory facilities needed for my work in the Department.

I sincerely acknowledge the research grant given to me by the Department of Science and Technology, Govt. of India to initiate this research work as Women Scientist (B) in the Department of Zoology, Rajiv Gandhi University. My sincere thanks go to the University Grant Commission, New Delhi for providing me fellowship and other financial assistances during my tenure of doctoral research in this University.

My sincere gratitude is also extended to Dr. A. K Das, Professor, Department of Botany for his support and help in identification of the plant species used in this study. I also express my thanks to Dr. D.N Das for his support to avail laboratory facilities during his tenure as the Head of the Department of Zoology. I offer my heart felt thanks to Dr. Ajit Hazarika for his timely advice in preparing my thesis in final shape. I thankfully acknowledge the keen interest and support offered by Mr Danial Mize and Mr. M.K Bharali, Assistant Professors of Zoology, RGU during my research. I would also like offer special thanks to my friend Buljit Buragohain and Devi Barua for all their help, support, interest and valuable hint during the study. In addition, I am thankful to Mrs J. Majumdar, P.Jamoh, M Rai, Mrs. T.Yanam, Dulal and Khagen of the Zoology Department for their valuable help during my research period.

During the course of this work, I was supported and helped by my friends Anju, Pranjiv, Sanjay, Purbajyoti, Hiranmayee and Rupa. They were always there to meet my problems and
with interesting discussions, it was always fun to be with them. I express my hearty thanks to all of them.

Besides all, I would like to mention about those, whose love, efforts, co-operation and inspiration had made me possible to complete this theses. They are my parents Sri Deba kumar Das and Smti Depali Das, who were always besides me with their love and faith. At last but not least, I express my deep sense of gratitude and indebtedness to my husband Sri Naba kumar Bhattacharyya, who was always a constant source of encouragement and understanding, my Bordeuta Lalit Chutia, my brother Gaureeshankar, my mother in law Renu Bhattacharyya, my sister in laws and other family members who have always there to support me with all their Good wishes.
