INTRODUCTION

1- Cognition
1.1 Mental processes
1.1.1 Attention
1.1.2 Memory
1.1.3 Perception
1.1.4 Language
1.1.5 Metacognition
  Cognitive impairment
1.2 Drug addiction
1.2.1 Substance dependence
1.2.2 Nature of drugs
1.2.3 How drug abuse and addiction can develop
1.2.4 Warning signs of drug abuse
1.2.5 Factors that affect the effectiveness and potency of drugs
1.2.6 Commonly Abused Substances
  Cocaine
1.2.7 Methods of Cocaine Abuse
1.2.8 Physiological Effects of Cocaine
1.2.9 Metabolism of Cocaine
1.2.10 Short-term effects of cocaine
1.2.11 Long-term effects of cocaine
1.3 Alcohol
1.3.1 Alcohol effect on body
1.3.2 Consequences of drinking too much
1.6 Memory
1.6.1 Sensory memory
1.6.2 Short-term memory
1.6.3 Long-term memory
1.6.4 Types of memory
1.7 Personality
1.7.1 Definition of Personality
1.8 Concept formation
1.8.1 The Process of Concept Formation
1.8.2 The Functions and Purpose of Concepts
1.8.3 Research Studies on Concepts
1.9 Counselling
1.6.1 Principals of counselling
1.6.2 The goals of Counselling
1.6.3 Counselling of Drug Addicts and Alcoholics
CHAPTER 2
REVIEW OF THE LITERATURE

2.1 Review of the literature
2.1.1 Review related with demographic data and addiction
2.1.2 Reviews related with Cocaine-induced effects on cognition
2.1.3 Reviews related with Alcohol-induced effects on cognition
2.1.4 Reviews related with cocaine-induced effects on Personality
2.1.5 Reviews related with Alcohol-induced effects on Personality
2.1.6 Reviews related with other substance and cognitive impairment
2.1.7 Reviews related with other substance and personality
2.1.8 Reviews related with effect of rehabilitation on drug abuse

CHAPTER 3
PROBLEMS AND HYPOTHESES

CHAPTER 4
METHODOLOGY

4.1 Research design
4.2 Participants (subjects)
4.3 Tools
4.3.1 Case study sheet
4.3.2 P.G.I. Memory Scale (PGIMS)
4.3.3 Eysenck Personality Questionnaire
4.3.4 Hanfmann&Kasanins’ Concept Formation Test
4.3.5 Global Assessment of Functioning Scale
4.4 Procedure
4.5 Statistical analysis

CHAPTER 5
RESULT AND DISCUSSION

5.1 Demographic data related to age
5.2 Demographic data related to sex
5.3 Demographic data related to education
5.4 Demographic data related to socio-economic status (SES)
5.5 Demographic data related to domicile
5.6 Mean and S.D. of cocaine abusers on memory test
5.7 Mean and S.D. of cocaine abusers on personality test
5.8 Mean and S.D. of cocaine abusers on concept-formation test
5.9 Mean and S.D. of alcohol abusers on memory test
5.10 Mean and S.D. of alcohol abusers on personality test
5.11 Mean and S.D. of alcohol abusers on concept formation test
5.12 Analysis of variance of one year, three years and five years cocaine abusers on memory test
5.13 Analysis of variance of one year, three years and five years cocaine abusers on personality
5.14 Analysis of variance of one year, three years and five years cocaine abusers on concept—formation test
5.15 Analysis of variance of one year, three years and five years alcohol abusers on memory test
5.16 Analysis of variance of one year, three years and five years alcohol abusers on personality test
5.17 Analysis of variance of one year, three years and five years alcohol abusers on concept formation test
5.18 Analysis of variance for effect of duration of cocaine abuse on memory test
5.19 Analysis of variance for effect of duration of cocaine abuse on personality test
5.20 Analysis of variance for effect of duration of cocaine abuse on concept formation test
5.21 Analysis of variance for effect of duration of alcohol abuse on memory test
5.22 Analysis of variance for effect of duration of alcohol abuse on personality test
5.23 Analysis of variance for effect of duration of alcohol abuse on concept formation test
5.24 Analysis of variance of one year cocaine and one year alcohol abusers on remote memory subtest
5.25 Analysis of variance of one year cocaine abusers and one year alcohol abusers on recent memory subtest
5.26 Analysis of variance of one year cocaine abusers and one year alcohol abusers on mental balance subtest of memory
5.27 Analysis of variance of one year cocaine abusers and one year alcohol abusers on attention concentration subtest of memory
5.28 Analysis of variance of one year cocaine abusers and one year alcohol abusers on delayed recall subtest of memory
5.29 Analysis of variance of one year cocaine abusers and one year alcohol abusers on immediate recall subtest of memory
5.30 Analysis of variance of one year cocaine abusers and one year alcohol abusers on retention of similar pairs subtest of memory
5.31 Analysis of variance of one year cocaine abusers and one year alcohol abusers on retention of dissimilar pairs subtest of memory
5.32 Analysis of variance of one year cocaine abusers and one year alcohol abusers on visual retention subtest of memory
5.33 Analysis of variance of one year cocaine abusers and one year alcohol abusers on recognition subtest of memory
5.34 Analysis of variance of one year cocaine abusers and one year alcohol abusers on psychoticism/socialization dimension of personality
5.35 Analysis of variance of one year cocaine abusers and one year alcohol abusers on extraversion/intraversion dimension of personality
5.36 Analysis of variance of one year cocaine abusers and one year alcohol abusers on neuroticism/stability dimension of personality
5.37 Analysis of variance of one year cocaine abusers and one year alcohol abusers for number of trails of concept formation
5.38 Analysis of variance of one year cocaine abusers and one year alcohol abusers for time taken of concept formation
5.39 Analysis of variance of one year cocaine abusers and one year alcohol abusers for error committed of concept formation
5.40 Analysis of variance of three year cocaine abusers and three year alcohol abusers on remote memory subtest
5.41 Analysis of variance of three year cocaine abusers and three year alcohol abusers on recent memory subtest
5.42 Analysis of variance of three year cocaine abusers and three year alcohol abusers on mental balance subtest of memory
5.43 Analysis of variance of three year cocaine abusers and three year alcohol abusers on attention concentration subtest of memory
5.44 Analysis of variance of three year cocaine abusers and three year alcohol abusers on delayed recall subtest of memory
5.45 Analysis of variance of three year cocaine abusers and three year alcohol abusers on immediate recall subtest of memory
5.46 Analysis of variance of three year cocaine abusers and three year alcohol abusers on retention of similar pairs subtest of memory
5.47 Analysis of variance of three year cocaine abusers and three year alcohol abusers on retention of dissimilar pairs subtest of memory
5.48 Analysis of variance of three year cocaine abusers and three year alcohol abusers on visual retention subtest of memory
5.49 Analysis of variance of three year cocaine abusers and three year alcohol abusers on recognition subtest of memory
5.50 Analysis of variance of three year cocaine abusers and three year alcohol abusers on psychoticism/socialization dimension of personality
5.51 Analysis of variance of three year cocaine abusers and three year alcohol abusers on extraversion/introversion dimension of personality
5.52 Analysis of variance of three year cocaine abusers and three year alcohol abusers on neuroticism/stability dimension of personality
5.53 Analysis of variance of three year cocaine abusers and three year alcohol abusers for number of trails of concept formation
5.54 Analysis of variance of three year cocaine abusers and three year alcohol abusers for time taken of concept formation
5.55 Analysis of variance of three year cocaine abusers and three year alcohol abusers for error committed of concept formation
5.56 Analysis of variance of five year cocaine abusers and five year alcohol abusers on remote memory subtest
5.57 Analysis of variance of five year cocaine abusers and five year alcohol abusers on recent memory subtest
5.58 Analysis of variance of five year cocaine abusers and five year alcohol abusers on mental balance subtest of memory
5.59 Analysis of variance of five year cocaine abusers and five year alcohol abusers on attention concentration subtest of memory
5.60 Analysis of variance of five year cocaine abusers and five year alcohol abusers on delayed recall subtest of memory
5.61 Analysis of variance of five year cocaine abusers and five year alcohol abusers on immediate recall subtest of memory
5.62 Analysis of variance of five year cocaine abusers and five year alcohol abusers on retention of similar pairs subtest of memory
5.63 Analysis of variance of five year cocaine abusers and five year alcohol abusers on retention of dissimilar pairs subtest of memory
5.64 Analysis of variance of five year cocaine abusers and five year alcohol abusers on visual retention call subtest of memory
5.65 Analysis of variance of five year cocaine abusers and five year alcohol abusers on recognition subtest of memory
5.66 Analysis of variance of five year cocaine abusers and five year alcohol abusers on psychoticism/socialization dimension of personality
5.67 Analysis of variance of five year cocaine abusers and five year alcohol abusers on extraversion/intraversion dimension of personality
5.68 Analysis of variance of five year cocaine abusers and five year alcohol abusers on neuroticism/stability dimension of personality
5.69 Analysis of variance of five year cocaine abusers and five year alcohol abusers for number of trails of concept formation
5.70 Analysis of variance of five year cocaine abusers and five year alcohol abusers for time taken of concept formation
5.71 Analysis of variance of five year cocaine abusers and five year alcohol abusers for error committed of concept formation
5.72 Difference of mean of cocaine users for counselling
5.73 Difference of mean of alcohol users for counselling

CHAPTER 6
SUMMARY

6.1 Introduction
6.2 Problem
6.3 Hypotheses
6.4 Methods
6.4.1 Design
6.4.2 Participants
6.4.3 Tools of the study
6.5 Findings of the study
6.5.1 Effect of cocaine abuse on cognitive impairment (memory, personality and concept formation)
6.5.2 Effect of alcohol on cognitive impairment (memory, personality and concept formation)
6.5.3 Effect of duration of abuse (cocaine) on cognitive impairment
6.5.4 Effect of duration of abuse (alcohol) on cognitive impairment
6.5.5 Difference between cocaine abusers and alcohol abusers on cognitive impairment (memory, personality and concept formation)
6.5.6 Effect of psychological counselling in the management of cocaine and alcohol
6.6 Limitations
6.7 Future research
6.8 Conclusions
