LIST OF TABLES

Table 1 Geographical attributes of Western Ghats 11
Table 2 Scientific classification of Dendrobium 14
Table 3 Evidence of various biological activities of Dendrobium genus 28
Table 4 Chemical and physical properties of Moscatilin 30
Table 5 Chemical and physical properties of Resveratrol 35
Table 6 Accession numbers given to the collected Dendrobium plants from the Western Ghats of Karnataka 47
Table 7 Quaternary pump program for screening crude extracts using C18 column 52
Table 8 Data of primers used in the present study for the selected Dendrobium species 59
Table 9 Data of the PCR Mix for psbA-trnH used in the present study for the selected Dendrobium species. 60
Table 10 PCR Mix for matK &rpoC1 used in the present study for the selected Dendrobium species 60
Table 11 PCR Mix for rbcL &ITS2 used in the present study for the selected Dendrobium species 60
Table 12 Sequence of RAPD primers and their GC content 64
Table 13 PCR Mix for RAPD Analysis 65
Table 14 Thermo-cycler conditions used for RAPD 65
Table 15 List of chemicals used for the study 73
Table 16  Sources of plastics and glasswares used  74
Table 17  Details of the software and databases employed for the study  74
Table 18  Details of the Instruments employed for the study  75
Table 19  Major phytochemicals identified in the methanolic extracts of Dendrobium species through Mass Spectrometry  94
Table 20  Nanodrop reading of Dendrobium species  99
Table 21  Annealing temperatures of 20 operon primers  108
Table 22  Percentage of polymorphism displayed by RAPD  108
Table 23  Cytotoxic potential of Moscatilin against various human cancer cell lines treated with different concentrations of Moscatilin in comparison with the positive control - Mitomycin C  114
Table 24  Yield of protoplasts and their percentage of viability estimated from leaves and tepals of Dendrobiums  130
Table 25  Number of fusants obtained from protoplasts after 3 h of incubation  134
