synthesis of silver nanoparticles using leaf extract of Phlogacanthus thyrsiformis and evaluation of their antibacterial and catalytic activity”.

Annexure II

List of Seminar/Conference/Workshop attended and paper presented

1. Poster Presentation entitled “Green synthesis of silver nanoparticles using leaf extract of phlogocanthus thrysiformis and evaluation of their antibacterial and catalytic activity” at National Seminar on Recent Advances in Chemical Research (RACR-14), at the Department of Chemistry, Rajiv Gandhi University, Arunachal Pradesh (20-21st March 2014).

3. Poster Presentation entitled “Synthesis of Silver Nanoparticle: Transforming Oxidation and ipso-Hydroxylation Reactions into a Biological Technology” (Department Annual Seminar) at the Department of Chemistry, Dibrugarh University, Dibrugarh (30th December, 2014).

5. Poster Presentation entitled “Immobilization of palladium in mesoporous silica matrix: Preparation, Characterization and its catalytic activity in Suzuki-Miyaura coupling reaction” at National Seminar on Contemporary
Developments in Chemical Sciences (CDCS- 2015) at the Department of Chemical Sciences, Tezpur University (23-24th November 2015)

INTRODUCTION
Acknowledgements to be used by RSC authors

Authors of RSC books and journal articles can reproduce material (for example a figure) from the RSC publication in a non-RSC publication, including theses, without formally requesting permission providing that the correct acknowledgement is given to the RSC publication. This permission extends to reproduction of large portions of text or the whole article or book chapter when being reproduced in a thesis.

The acknowledgement to be used depends on the RSC publication in which the material was published and the form of the acknowledgements is as follows:

- For material being reproduced from an article in *New Journal of Chemistry* the acknowledgement should be in the form:
  - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the Centre National de la Recherche Scientifique (CNRS) and the RSC

- For material being reproduced from an article *Photochemical & Photobiological Sciences* the acknowledgement should be in the form:
  - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the European Society for Photobiology, the European Photochemistry Association, and RSC

- For material being reproduced from an article in *Physical Chemistry Chemical Physics* the acknowledgement should be in the form:
  - [Original citation] - Reproduced by permission of the PCCP Owner Societies

- For material reproduced from books and any other journal the acknowledgement should be in the form:
  - [Original citation] - Reproduced by permission of The Royal Society of Chemistry

The acknowledgement should also include a hyperlink to the article on the RSC website.

The form of the acknowledgement is also specified in the RSC agreement/licence signed by the corresponding author.

Except in cases of republication in a thesis, this express permission does not cover the reproduction of large portions of text from the RSC publication or reproduction of the whole article or book chapter.

A publisher of a non-RSC publication can use this document as proof that permission is granted to use the material in the non-RSC publication.
