ACKNOWLEDGEMENTS

“The single greatest cause of happiness is gratitude.”

First and above all, I would like to thank God Almighty for giving me the strength and opportunity to undertake this research study and complete it. Without his blessings, this achievement would not have been possible.

The work presented in this thesis would not have been possible without my close association with many people. I take this opportunity to extend my sincere gratitude and appreciation to all those who made this PhD thesis possible.

In my journey towards this degree, I have found a teacher, an inspiration, a role model and a pillar of support in my Guide, Dr. Deepak Kulkarni, Dean, Dr. D. Y. Patil Dental College and Research Institute, Pimpri. He has provided profound support, guidance and was considerate at all times. He has given me all the freedom to pursue my research and has shown lot of concern, as I being an external candidate. I am grateful to Sir for giving me time in spite of his busy schedule. It is with his supervision that this work came into existence. I shall remain eternally indebted to Sir for his generosity.

My special words of thanks should also go to my first Guide, Dolas Sir for giving me this opportunity and my research co-guide Dr. (Mrs.) Sangeeta Patankar, HOD, Dept. of Oral Pathology, YMTDC, Navi Mumbai for her continuous support, guidance, cooperation, and for facilitating all the requirement.

I am also deeply thankful to Dr. Sharad Kokate, Dean, YMTDC, Navi Mumbai, for supporting me to pursue my studies here at Dr. D. Y. Patil Dental College and Hospital.
I am so grateful to Dr. Supriya Kheur, HOD, Dept of Oral Pathology, Dr. D.Y. Patil Dental College, for her constant guidance, encouragement, her scientific inputs, personal helps and extended support. She has taught me another aspect of life, that, “goodness can never be defied and good human beings can never be denied”. I owe a lot of gratitude to her for always being there for me and I feel privileged to be associated with a person like her. I could always look back on her for any support during my course of PhD…thank you Madam for everything.

I owe a lot of gratitude to Dr. Sachin Sarode and Dr. Gargi Sarode for their kind help and guidance. I am grateful to them for their valuable advice, expert guidance and providing new ideas for research.

My heartfelt thanks to Kalyani Bhat Madam. Her guidance, cooperation, and support have always kept me going ahead. Without her reminders I would not have been able to follow the time lines.

I must thank Salvi Sir for his kind support, help and advice throughout my tenure at DPU. I acknowledge his kindness, patience and I am extremely grateful to him for providing solutions over all my technical difficulties. I acknowledge Miss Vahida and the office staff who were always ready to give their timely help whenever required.

My sincere thanks to Mrs. Sayli Pokharkar, Senior technician, Dept. of Oral Pathology, YMTDC, for helping me with the standardization of immunohistochemistry staining procedure and for her excellent technical assistance.

I gratefully acknowledge Research council members for their insightful comments and guidance. I would like to extend my gratitude to all the patients who consented to participate in this study.

My deepest appreciation to my PG students, Dr. Snehal Dhumal and Dr. Sneha Masne who helped me in this journey of research.
I owe my deepest gratitude towards my better half for his eternal support and understanding of my goals and aspirations. His infallible love and support has always been my strength. His patience and sacrifice will remain my inspiration throughout life. Without his help, I would not have been able to complete much of what I have done. I am also thankful to my daughter, Anwesha for being so understanding and supporting me throughout. I am also very much grateful to my parents and mother in law for their blessings, constant help and unconditional support.
