**Preface**

**Contents**

1. Introduction
   - 1.1 Concept of Plate Tectonics  
   - 1.2 The Neo-Tethys  
   - 1.3 Ophiolite Belt of the IMR  
   - 1.4 General accounts of the IMR States in India
     - 1.4.1 Nagaland  
     - 1.4.2 Manipur  
     - 1.4.3 Mizoram  
   - 1.5 Present Works
     - 1.5.1 Objectives  
     - 1.5.2 Methodology  
   - 1.6 Field works and laboratory studies

2. Geological and tectonic setting of the Indo-Myanmar Ranges of Northeast India
   - 2.1 Geneal geological and tectonic setting  
   - 2.2 Physiography  
   - 2.3 Stratigraphy and lithology  
   - 2.4 Tectonic subdivisions  
   - 2.5 Tectono-stratigraphy

3. Drainage system and its tectonic implications
   - 3.1 Generalized pattern of the drainages in NE states
     - 3.1.1 The Doyang system  
     - 3.1.2 The Barak system  
     - 3.1.3 The Tizu system  
     - 3.1.4 The Yu-Khampat system  
     - 3.1.5 The Manipur system  
     - 3.1.6 The Southern Mizoram system  
   - 3.2 Relationship between drainages and tectonic structures
