# TABLE OF CONTENTS

List of tables  iv
List of figures  v
Abbreviations  vii

**Chapter**

1. INTRODUCTION  1–8
   1.1. Background  1
   1.2. Rationale and Objective of the Research  7

2. REVIEW OF LITERATURE  9–24
   2.1. Distribution and historical development  9
   2.2. Irradiation induced changes in life history traits  10
   2.3. Dose response and mortality curves  13
   2.4. Cytogenetic studies  14
   2.5. Genotoxicity studies: Comet Assay  19
   2.6. Biochemical studies  21
      2.5.1. Antioxidant studies  21
      2.5.2. Heat shock protein (HSP) studies  23

3. BIOLOGY OF *Aedes aegypti*  25–30
   3.1. The systematic position  25
   3.2. Life Cycle  25
   3.3. Ecology of *Ae. aegypti*  28

4. MATERIALS AND METHODS  31–48
   4.1. Mosquito culture  31
   4.2. Pure line (PL) synthesis  31
   4.3. Effect of irradiation on the life history traits of *Ae. aegypti*  33
      4.3.1. Irradiation  33
      4.3.2. Life history traits parameters measured  35
      4.3.3. Data analysis  36
   4.4. Dose response curve for fertility and sterility  37
   4.5. Mortality curves (LD50 and LD90)  37
   4.6. Study of unhatched embryonated and non-embryonated eggs  38
      4.6.1. Unhatched eggs analysis  38
4.6.2. Sodium hypochlorite (NaOCl) digestion of egg chorion 38
4.6.3. Morphological analysis of embryo 38
4.7. Cytological studies 39
  4.7.1. Irradiation and Genetic crosses 39
  4.7.2. Lacto-aceto-orecin stain preparation 39
  4.7.3. Chromosome preparation and analysis 39
4.8. Genotoxicity study: Comet Assay 40
  4.8.1. Irradiation 40
  4.8.2. Comet assay 40
  4.8.3. Slide preparation 41
  4.8.4. Comet Capture 41
  4.8.5. Statistical analysis 42
4.9. Biochemical studies 42
  4.9.1. Study of Antioxidants level 42
    4.9.1.1. Irradiation 42
    4.9.1.2. Preparation of sample 42
    4.9.1.3. Protein Assay 42
    4.9.1.4. Biochemical Assay 43
  4.9.2. Heat Shock Proteins (HSPs) Expression 45
    4.9.2.1. Irradiation 45
    4.9.2.2. Preparation of sample 45
    4.9.2.3. SDS PAGE 45
    4.9.2.4. Protein visualization: Coomassie staining 46
    4.9.2.5. In-gel digestion and LC-MS / MS Analysis 46
    4.9.2.6. Data Analysis 48
5. RESULTS 49-97
  5.1. Pure line (PL) synthesis 49
  5.2. Effect of irradiation on the life history traits of *Ae. aegypti* 49
    5.2.1. Fecundity 49
    5.2.2. Hatchability 49
    5.2.3. Adult emergence 50
    5.2.4. Sex ratio 50
    5.2.5. Longevity 50
  5.3. Dose response curve 51
