ACKNOWLEDGEMENT

I wish to express my warmest gratitude and appreciation to all those who have helped and guided me through the academic journey to accomplish this thesis. I am grateful for all the support I have received from academic professionals. I am also grateful to people outside the academic area who gave me love and care. You have all contributed to this thesis. I would like to thank in particular.

Professor Sanjib Mridha, my supervisor, for being a demanding and skilful supervisor, for brilliant knowledge and never-ending belief in me as a research student, and for giving support and encouraging comments in manuscripts and at seminars throughout the research process.

Dr. Santana Goon, for lots of encouraging support, for giving me valuable advice concerning psychological aspects in my research.

Sangita Banik, for helping me to standardise the questionnaire, for lots of encouraging support and for continuous friendly support.

Pratima Das and Sajal Kumar Mandal for helping me to translate the questionnaire from English version to Bengali version.

The inspiring team-mates in Kalyani University like Monder Kanti Mandal, Pijush Sarkar, Sudhanshu Dey for nice discussions, support, and valuable feedback on papers and other research matters.

Pallob Kumar Mandal for help with input in the SPSS data files and calculation in the study.

The staff at the Library of Kalyani University for helping me to find the articles I needed. Children and adolescents who performed the physical fitness tests and answered the questionnaires, for being not only cooperative, but also for being extremely nice and curious about the research.

Headmasters and teachers at the schools involved in the studies, for permission to perform the studies and giving me access to meet the students.
