Acknowledgement

Foremost, it gives me immense pleasure to express my sincere and deepest gratitude to my Supervisor Prof. Sheo Mohan Prasad for giving me an opportunity to work in Ranjan Plant Physiology and Biochemistry Laboratory, Department of Botany, University of Allahabad. I am extremely grateful for his continuous support in my D. Phil. study and research, for his patience, motivation, enthusiasm, and immense knowledge. The work presented in this thesis would not have been successfully accomplished without his encouragement, insightful comments and critical analysis. It’s my fortune and I am proud to have him as my guide. Indeed, I am honored to be one of his students.

I express my sincere regards to Prof. Anupam Dikshit (Head) and ex Heads, Prof. D.N. Shukla, Prof. Nupur Bhowmik and Prof. D.R. Misra, Prof. G.K. Srivastava, Department of Botany, University of Allahabad, for their support and providing all necessary laboratory facilities during this research period. I wish to extend my deep sense of indebtedness and reverence to my esteemed teachers Prof. D.K. Chauhan, Prof. (Mrs.) Manju Sahni, Prof. G. Kumar, Prof. N. B. Singh, Prof. (Mrs.) H.K. Kehri, and Prof. Satya Narain for their constant cooperation and encouragement during my research work.

It is my great privilege to acknowledge Dr. Parvati Singh, Associate Professor in Home Science, Mahila Seva Sadan Degree College, Allahabad for her kind help, encouragement and fruitful nature giving full time for this work and also for her care.

It gives me immense pleasure to acknowledge to my senior mentors Dr. Mohd. Zeeshan, Dr. M.P.V.V.B Singh, Dr. Deelip, Dr. Rajiv Dwivedi, Dr. Vagish Mishra, Dr. (Mrs.) Garima Srivastava, Dr. (Mrs.) Ranjana Singh, Dr. (Mrs.) Sheeba, Dr. (Mrs.) Pragya Shukla, Dr. (Mrs.) Geeta Yadav, Dr. (Mrs.) Gunjan Dubey and Dr. Sushil Kumar for their support and cooperation. I express my sincere thanks to Dr. Vijay Pratap Singh, Dr. Prabhat Kumar Srivastava, Dr. Anita Singh, Dr. Rohit Kumar Mishra and Dr.
Pratibha Singh for their encouragement, moral support and valuable guidance which inspired me to do my best. I would like to express my heartiest thanks to my senior fellow researchers Ms. Gausiya Bashri, and Mrs. Pragya Mishra and my colleagues Madhulika Singh, Jitendra Kumar, Parul Parihar and Rachana Singh for their team spirit, enormous help to carrying out the investigations and writing of the manuscripts and remained beside me in my odd times. I am also thankful to Anuradha Patel and Sanjesh Tiwari for giving me the inward support during this work.

Interdependence is certainly more valuable than independence. Words are inadequate in offering my thanks to my seniors in the department Dr. Shiv Mahendra Singh, Dr. Ram Singh Yadav, Dr. Durgesh Kumar Tripathi, Dr. Dharmendra Kumar, Dr. Sarvesh Singh for their encouragement and moral support throughout. This is a pleasant opportunity to express my gratitude for all of them. I would always be grateful to Mr. Pancham Lal Gupta (Department of Chemistry, University of Florida, USA), who always tried his best to send me some of the important research papers that I required for my research work.

With all regards, I also acknowledge the cooperation and help of all teaching and non-teaching staff of University of Allahabad, Allahabad.

I am deeply indebted to my revered parents who enlighten the way of my life with their painstaking efforts and hard work, care, love, and contribution for shaping and molding my scientific career. I wish to acknowledge my continued debt to my elder brother Dr. Amaresh Singh for his moral support, kind help, encouragement and fruitful nature which make me to share all the things with him. A special note of gratitude goes to niece Neelu Singh for her kind help in so many ways. I also would like to thank my cousin brother Shyam Babu Singh for his unconditional help.

It was really a pleasure to be benefitted by enormous help and support of Dr. Prabhat Kumar Srivastava (Assistant Professor at Govt. Degree College, Bhaiyathan, Surajpur, Chhattisgarh, India). His jovial and sensible attitude coupled with extraordinary potential to work, with perfection and dignity is really commendable. His
Humility reminds me that the true merit is like a river: the deeper it is, the less noise it makes. I will be always be grateful to Dr. Anita Singh (Young Scientist, Ranjan Plant Physiology and Biochemistry Laboratory, Dept. of Botany, University of Allahabad, Allahabad) for her help and support during the thesis work. I can never forget her constant encouragement and persuasiveness during the course of my work.

The chain of my gratitude would be definitely incomplete if I would forget to thank the Almighty of this chain, The God Himself. Thank God, for providing me the opportunity to step in the excellent world of science and for making all of this possible.

Last but not the least, I also wish to thank all my friends for their constant and unconditional support. They have been real source of illumination and also the most kind, helpful and trustful friends.

A special thanks goes to University Grant commission (UGC), New Delhi for awarding me the project fellow under UGC-Major Research Project (Project No: 41-460/2012(SR) sanction to Prof. S.M. Prasad).
