3.2 RCC beam column joint with diagonal cross bracing bars at the joint.
3.3 RCC beam column joint with diagonal cross bracing bars at the joint and extending in beam direction 0.1B
3.4 RCC beam column joint with diagonal cross bracing bars at the joint and extending in beam direction 0.2B
3.5 RCC beam column joint with diagonal cross bracing bars at the joint and extending in beam direction 0.3B
3.6 RCC beam column joint with diagonal cross bracing bars at the joint and extending in column direction 0.1H
3.7 RCC beam column joint with diagonal cross bracing bars at the joint and extending in column direction 0.2H
3.8 RCC beam column joint with diagonal cross bracing bars at the joint and extending in column direction 0.3H
3.9 RCC beam column joint with diagonal cross bracing bars at the joint and extending in beam direction 0.3B and column by 0.3H.
3.10 RCC beam column joint with steel fibre at the joint
3.11 RCC beam column joint with steel fibre at the joint and extending in beam direction by 0.1B
3.12 RCC beam column joint with steel fibre at the joint and extending in beam direction by 0.2B
3.13 RCC beam column joint with steel fibre at the joint and extending in beam direction by 0.3B
3.14 RCC beam column joint with steel fibre at the joint and extending in column direction by 0.1H
3.15 RCC beam column joint with steel fibre at the joint and extending in column direction by 0.2H
3.16 RCC beam column joint with steel fibre at the joint and extending in column direction by 0.3H

3.17 RCC beam column joint with steel fibre at the joint and extending in beam direction by 0.3B and column direction by 0.3H

3.18 Typical view of fabricated reinforcement cage as per IS-456-2000

3.19 Typical view of fabricated reinforcement cage with diagonal cross bracing bars at the joint.

3.20 Typical view of steel fibre for adding to the beam column joint.

3.21 Typical view of casting of beam column joints as per IS 456-2000

3.22 Typical view of casting of specimens and concrete cubes

3.23 Typical view of casting of specimens with steel fibre at the joint

3.24 Typical view of beam column joint specimens.

3.25 Typical view of beam column joint specimens test setup

3.26 Test load cell.
