First and foremost, I thank Almighty God for his love and countless blessings in my journey towards the completion of my thesis.

I would like to express my gratitude and sincere thanks to my mentor, Prof. R. N. Sharan for his valuable guidance and encouragement throughout the study. His knowledge and experience in the subject of Biochemistry and his words of wisdom have always guided and helped me during the entire study and words will not be enough to show my appreciation for the knowledge I have gained in the process. Indeed, it has been a privilege to work under his kind supervision.

I would like to thank Prof. D. Syiem, the Head of the Department, Biochemistry for allowing me to avail and use the facilities in the department. I would also like to extend my sincere gratitude to all the teachers in the department - Prof. A. Alam, Prof. A. K. Singh, Prof. R. Sharma, Prof. M. B. Syiem, Dr. P. K. Ambash, Dr. S. Bhan, Dr. L. Kma and Dr. T. Tripathi for their encouragement and support. I also thank the non-teaching staff of the department for rendering their help during the course of my research. A special thanks to Mr. Pynkhup for the computer technical assistance throughout the course and especially in perfecting the layout of this thesis.

I thank Prof. Uma Shankar, the Head of Department, Botany and Prof. N. K. Chrungoo, Department of Botany for allowing me to use the facility in the department.

My heartfelt gratitude to all the volunteers for donating the blood samples and also the medical staffs of the Health Center, NEHU for their valuable help in collecting the blood samples.

I am thankful to all my past and present colleagues of the Radiation countermeasures and Carcinogenesis units; Saiba, Mimin, Khet, Doreen, Manda, Taranga, Shivani, Anisha, Malem and Caster for their help and support.
I would like to specially thank my parents and siblings for their love, prayers and support during the entire course of my study endeavour. Most importantly, I would like to remember and thank my late mother, who was very special to me and to whom I would like to dedicate this research work. I would also like to thank my relatives, my friends and well wishers for their encouragement throughout the study.

Last but not the least, I would like to thank all the agencies that funded this high-budget research: International Atomic Energy Agency (IAEA), Austria; Department of Atomic Energy (DAE), India; Board of Research in Nuclear Sciences (BRNS), India; Science and Engineering Research Board (SERB), India; Department of Science and Technology (DST) Infrastructure Grant, India and University Grants Commission- Departmental Research Support (UGC-DRS), India. Financial assistance from NEHU-non NET, UGC-DRS and National Fellowship for Higher Education (NFHE) in the form of JRF and SRF is duly acknowledged.
