As the years of hard work have come to fruition, I cannot but fondly remember all who have helped and supported me along the way.

First and foremost, I thank the Almighty for the blessings He has bestowed upon me. The good health, peace of mind, strength and perseverance needed throughout my PhD work was only made possible through Him.

I am highly indebted to my supervisor, Prof. R. N. Sharan, for being my guide and mentor not only for the purpose of my thesis but for life in general. His insights and knowledge inspires me to continue learning and has proven that knowledge is indeed limitless. His tact in critiquing my work in the kindest and most constructive of ways never ceases to amaze me. He has always given me the freedom to work according to my convenience, has always been opened to my views and opinions and is ever encouraging me to think outside the box. It has been an honour, Sir, to be given the opportunity to work under your guidance and to have learnt from you. My heartfelt gratitude to you for teaching me alternative approaches to facing challenges not only in the field of research but in life too.

It gives me great pleasure to thank my parents, my brother, Sanpun Kune and my sisters, Pun Rosina, Handakaru, Mansahaka, Dakahipaya, Suhakani and Isika for being the biggest support system throughout the course of my work. Their constant encouragement and belief in me has given me the motivation needed to complete my PhD thesis.

I would like to thank our present and past heads of the department, Prof. A. K. Singh, Prof. D. Syiem, Prof. R. Sharma and Prof. A. Alam for allowing me to freely use the facilities in the department throughout the course of my work. Furthermore, I would like to take this opportunity to thank my other teachers of the department, Prof. A. N. Rai, Prof. M. B. Syiem, Dr. P. K. Ambasht, Dr. L. Kma, Dr. S. Bhan and Dr. T. Tripathi for the help extended to me from the time I was an MSc

student and throughout my time as a PhD scholar. They have piqued my scientific curiosity and heightened my interest in research.

I extend my deepest gratitude to the non-teaching staff of the department, Kong Pyngrope, Bah Kharir, Kong Iba, Bah Pon, George, Andrew, Mr. M. B. Singh and Mr. B. Medhi for the invaluable help they provided me. I express my sincerest gratitude to Bah Pynkup for helping me refine the layout of my thesis and for giving me several computer lessons.

I am deeply grateful especially to Prof. D. Syiem, for letting me use the BioRad ChemiDoc™ MP Imaging System in his laboratory. My sincere gratitude also goes to his students, Daiaahun, Sheelareen, Careen and Wankupar who always made me feel welcome in their laboratory and helped me in every way they could. I thank Prof. A. K. Singh and his students, Bobby, James, Anjana, Chester and Roselin for allowing me to work in their laboratory whenever I needed to.

I would like to express my sincerest gratitude to Prof. N. K. Chrungoo of Department of Botany and his students, Neeta, Jashmi, Lashaihun, Amilia, Upasna, Gayle, Sushmita, Mona, Jyoti, Sunita and Babita for allowing me to utilise the facilities of their laboratory.

I thank my lab mates, Khet, Saiba, Doreen, Elfius, Joshua, Taranga, Shivani, Anisha, Malem and Caster, many of whom have become my very good friends. I truly appreciate their ever willing nature to help me. The lively discussions we shared over work will surely be missed. My gratitude goes to Bah Lux, Omega, Susan, Preeticia, Stephanie, Momita, Ivy, Bantei, Manab, Babiang, Abani, Tridip and Viseto for every bit of help they extended to me over the years. I will always fondly remember the scientific as well as the non-scientific talks we shared over several cups of tea and coffee.

I especially thank Khet, Iba, Teikur, Robin, James, Suvas, Anupama, Bhaswati, Reema and Stithi for the constant encouragement and support they offered me. I am particularly grateful to them for helping me solve the challenges I encountered and for helping me stay grounded and sane.
I take this opportunity to appreciate and thank my friends, Shekinah, Allan, Mawroh (Banrapbor), Manbha, Yoowandaka, Daribha, Koel, Kheyali and Ialam for their moral support. I will forever be grateful for the much needed break in monotony they provided me during the entire period of my work.

I am thankful to everyone who participated and provided blood samples required for my thesis. I thank the nurses, Sisters G. G. Syiem, E. Khyriem and M. Kharumnuid at the dispensary (Health Clinic) of North-Eastern Hill University who helped me with my sample collection. With your help and kindness, my work was made easier.

Financial assistance from IAEA, Vienna, DAE, BRNS, SERB, India, DST Infrastructure Grant, UGC-DRS and UPE is duly acknowledged.

Fellowship granted from North-Eastern Hill University (Non-NET), DRS-III and in the form of JRF and SRF from Council of Scientific and Industrial Research, New Delhi are duly acknowledged.
