Acknowledgement

I am grateful to God for the good health and wellbeing that were necessary for the completion of my Ph.D thesis.

I would like to express my gratitude to my supervisor Professor, Head of the Department, Dr. Kamayani Mathur for the continuous support she provided me for my Ph.D study and research. She has been a tremendous mentor who encouraged my research and allowed me to grow as a research scholar. She patiently guided me at every stage of research work and without her persistent help; this research work would not have seen the face of completion. I am indebted to her for sharing her expertise and sincere and valuable guidance.

My sincere thanks to Late Dr. Pravin Patel, Dr. Manish Banker and Dr. Sandeep Shah, consultants at Nova IVI Fertility, Ahmedabad for their unprecedented help. They granted me the permission to interact with the patients undergoing the treatments of infertility at their hospital. I would also like to express my gratitude to the entire team of Nova IVI Fertility, Ahmedabad who helped me in many ways during my data collection.

A special thanks to my family especially my mother for her motivation and support throughout my research work.

Last but not the least; I also place on record my sense of gratitude to all, who directly or indirectly, lent their hands in this research.
