Acknowledgement

With a grateful heart, first and foremost, I want to give thanks to our Almighty Lord for His Grace and strength amidst the obstacles I faced. It was only through His Grace that I am able to complete my thesis.

I am particularly very grateful to my Supervisor, Prof. S.B. Prasad who was like a father figure who inspired, taught and led me during the course of this research work. His guidance and persistence has been imperative in shaping this thesis.

I express my gratitude to the teachers of the department and the Heads of Department (L) Prof. B. Kharbuli, Prof. N Saha and Prof. S. N. Ramanujam for provision of relevant departmental facilities and help.

I take this opportunity to thank Prof. S.R. Joshi, Department of Bioinformatics and Biotechnology who was so kind to permit me to complete the components of my thesis in his laboratory. My sincere gratitude also goes to Dr. Madan Gopal Borthakur, IIT, Biotech Park, Guwahati, for GC-MS analysis.

I am thankful to the traditional healers, the local inhabitants and the senior citizens of Ngunraw village, South west Khasi hills district of Meghalaya, India who helped and shared the information during field survey and propolis collection.

My sincere appreciation goes to the staffs of SAIF, NEHU and NEDC, Shillong for their assistance in my work.

I would also like to express my deep appreciation to the UGC, Non-NET Fellowship and National Fellowship For Higher Education for ST students for the financial support.

My gratitude also goes to the non teaching staffs of Zoology Department especially Sir James Khongsngi for his encouragement and support. My seniors Dr. Verma, Dr. Amenla, Dr. Rongoi and Dr. Kalita. My labmates Anamika, Manash, Grimchi and Rajesh
for their endless support and scrupulous discussions. Also to my
dearest friends, Shan, Daphi, Tada, Jane, Shingain, Sunil, Ravi and
other fellow research scholars in the department who have been an
enormous help to me. Thank you!

I am most grateful to my family, especially Mei, Kong Bih and Bah
Sham who through their relentless prayers have supported me in my
journey. This thesis is a manifestation of their fervent prayers.

Finally, my appreciation goes to all my well wishers. God Bless you
all.
