ACKNOWLEDGEMENT

This thesis arose in part out of years of research. By that time, I have been accompanied and supported by a great number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

In the first place and foremost, I pay my heartiest gratitude to Prof. Aditya Shastri, Vice Chancellor, Banasthali Vidyapith. He has given me the opportunity for doing research in this institution. It is really a great pleasure for me. I sincerely acknowledge my deepest sense of gratitude to Prof. Chitra Purohit, President, Banasthali Vidyapith.

I would like to record my gratitude to my supervisor Dr. Seema Verma for her supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences throughout the work. I have been under her able guidance since 2014 when she encouraged me to start this work and gave me the opportunity to be a member of her inspiring research group. Above all and the most needed, she provided me unflinching encouragement and support in various ways. Her constant mentorship has inspired and enriched my growth as a student and a researcher. During these years I have known her as a systematic, organized, agile and principle-driven person. Her overly enthusiasm and integral view on research and her mission for providing ‘only high-quality work and not less’, has made a deep impression on me. I owe her lots of gratitude for having shown me this way of research. Her endless support, patience and constructive criticism have been precious during these years. I shall always remain deeply indebted to her for ingenious guidance, affectionate glances and generosity bestowed on me, which assisted me to overcome every problem that came in my way during the period of this investigation and preparation of this manuscript. I would also like to thank her for keeping an eye continuously on the progress of my work and was always available even during personal vacations and providing valuable guidance and comments on this work.

It is a pleasure to pay tribute to all the faculty members of the Department of Computer Science, Banasthali Vidyapith who have assisted me in my endeavour of investigation.

I am deeply indebted to my parents who deserve special mention for their inseparable support and prayers. I am immensely indebted to my parents for their effort to give me the best
possible education and teaching me the value of knowledge, the joy of love and the importance of family. They have stood behind me in everything I have done, providing constant support, continuous encouragement and true love. My Father, Sri. Darshan Lal Saxena, has put enormous efforts in shaping my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Smt. Rama Saxena, has made immense sacrifices for raising me with her caring, love and affection, giving away her illustrious career for her children. I am thankful to the encouragement from my wife Pooja, whose support and guidance helped me and made this effort see through.

Finally, I would like to thank everybody who has been important to the successful realization of thesis, as well as expressing my apology that I could not mention everyone personally one by one.

With limitless humility, I would like to thank the Almighty GOD, Merciful Compassionate who bestowed me with all the favourable circumstances to go through this crucial juncture.

(Mani Madhukar)
